

Building User Interfaces

Visual Design

Professor Bilge Mutlu

What we will learn today?

- Elements and principles of design
- Color, type, and images

Elements of Design

Elements of Design

1. Space
2. Line
3. Shape
4. Size
5. Pattern
6. Texture
7. Value

Space¹

Definition: Space is the canvas on which visual elements are placed.

- Space can be *positive* or *negative*
- *Positive*: where the subject is positioned
- *Negative*: the space surrounding the subject
- Negative space can be used as positive

¹Image sources: [this slide](#), next slide: [left](#), [right](#)

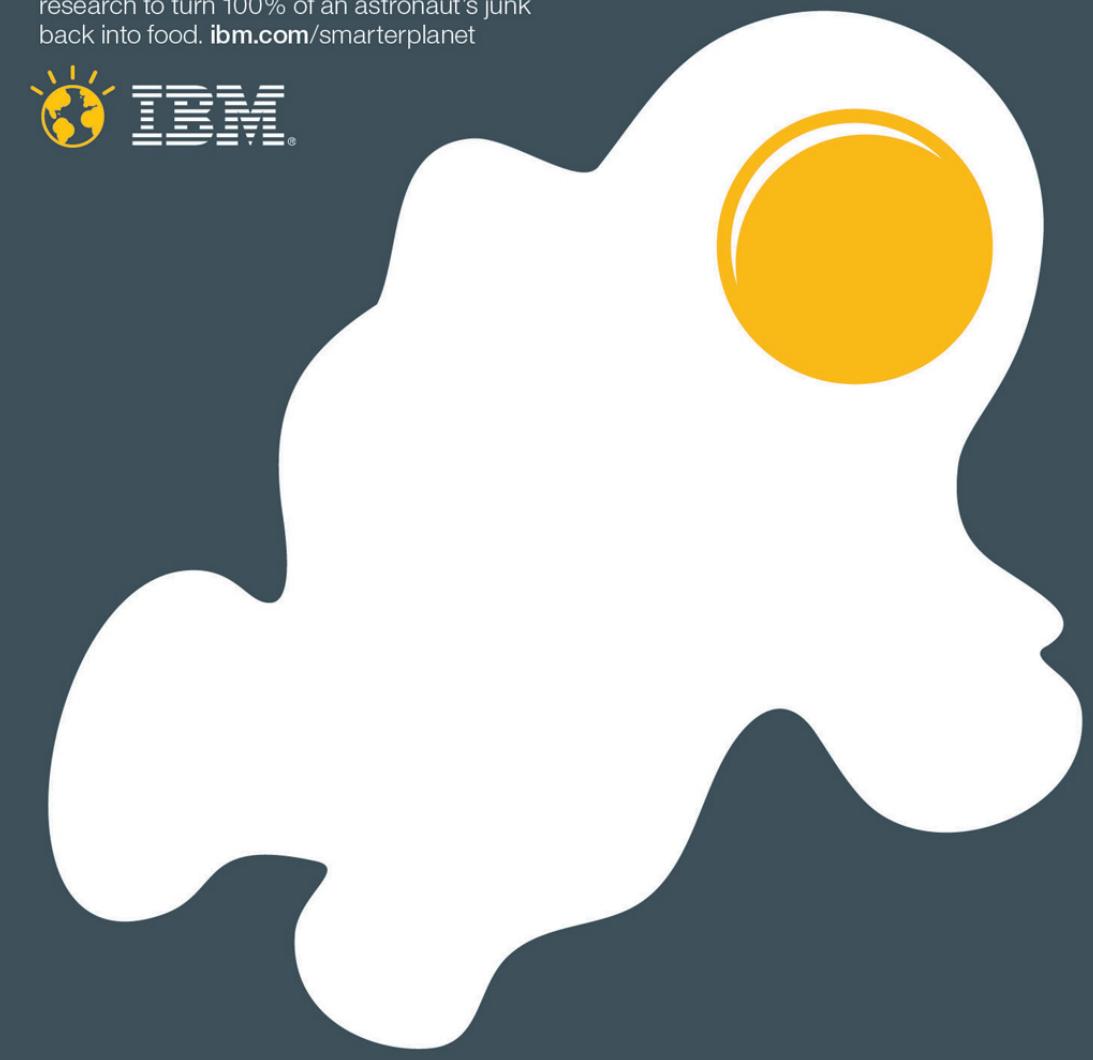

Now data helps pinpoint more oil.

In Venezuela, IBM deep computing processes seismic data, helping Tricon Geophysics pinpoint new oil and gas using 40% less energy. ibm.com/smarterplanet

Food is now prepared for space.

The European Space Agency is using smarter research to turn 100% of an astronaut's junk back into food. ibm.com/smarterplanet

Line²

Definition: The most primal design element that can divide space, call attention to, organize, and make up other elements.

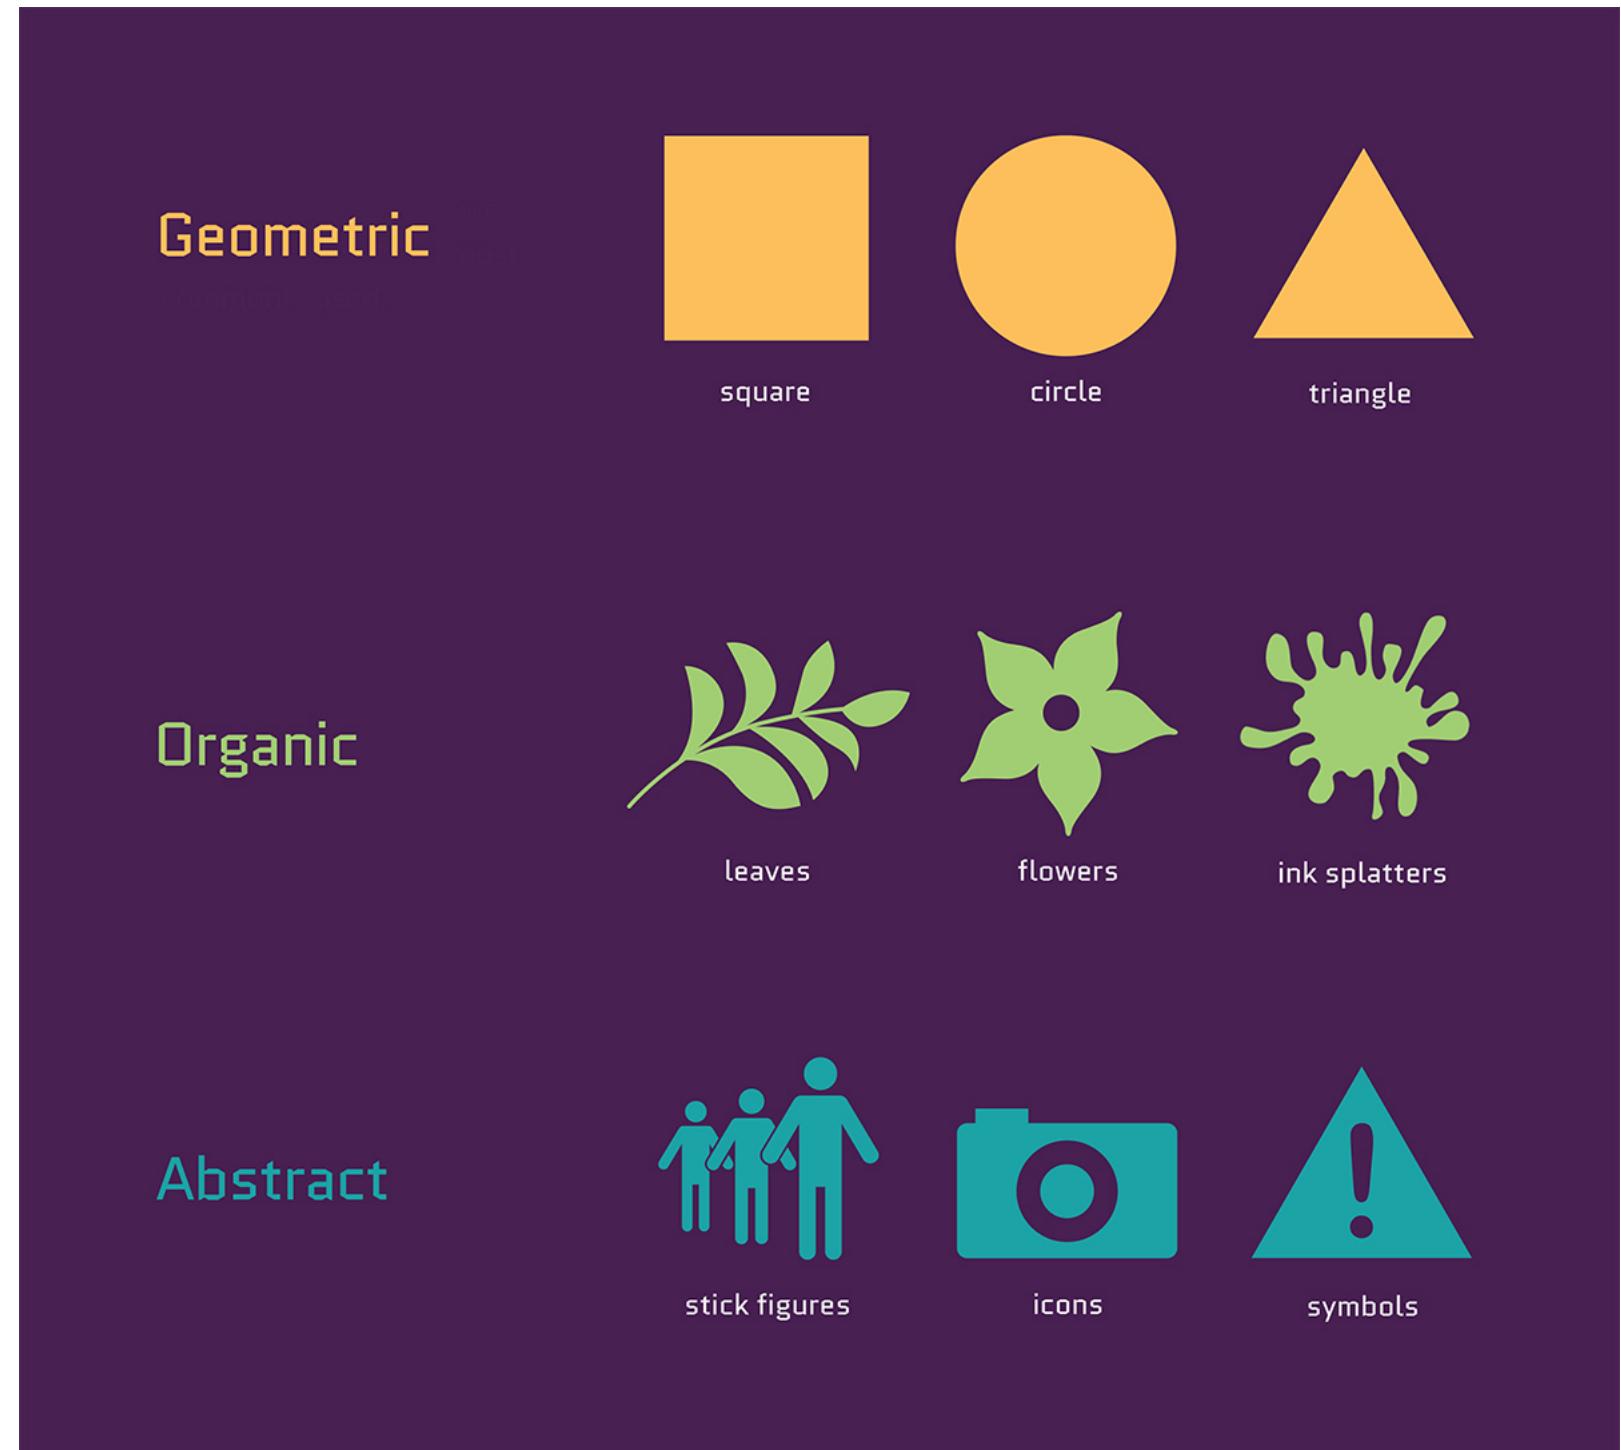

²[Image source](#)

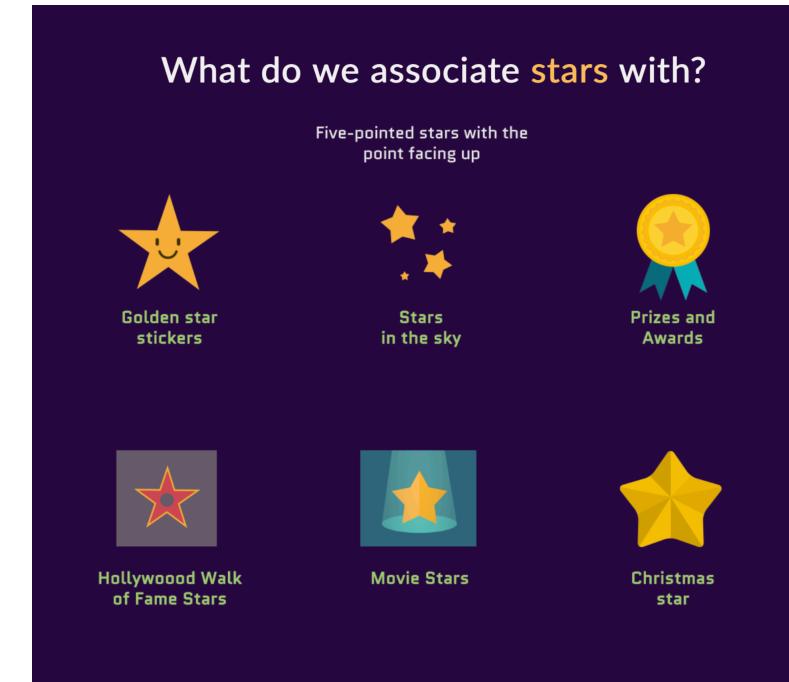

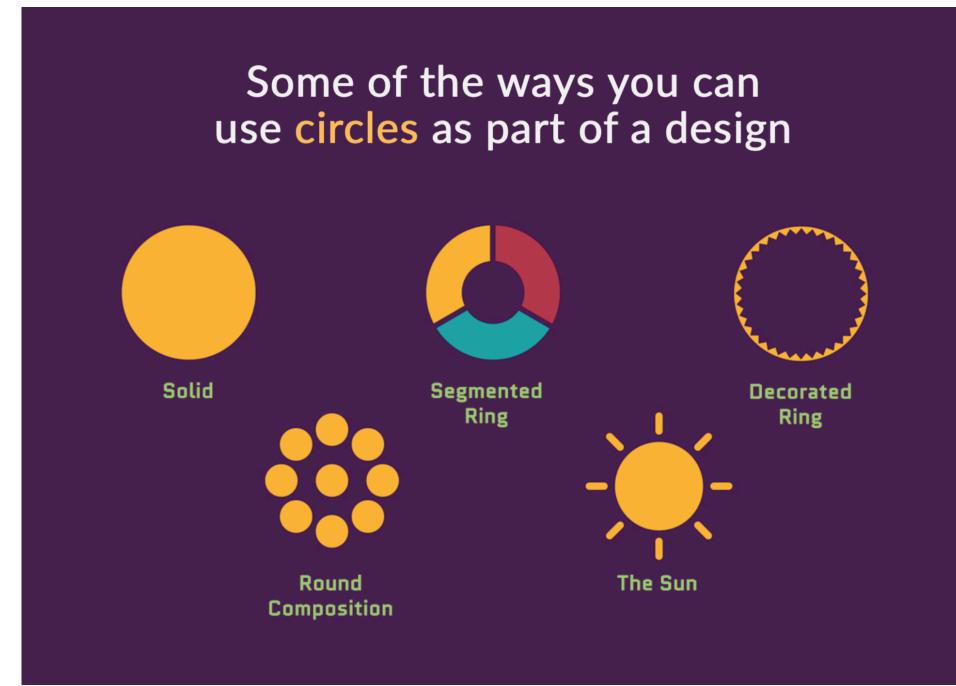

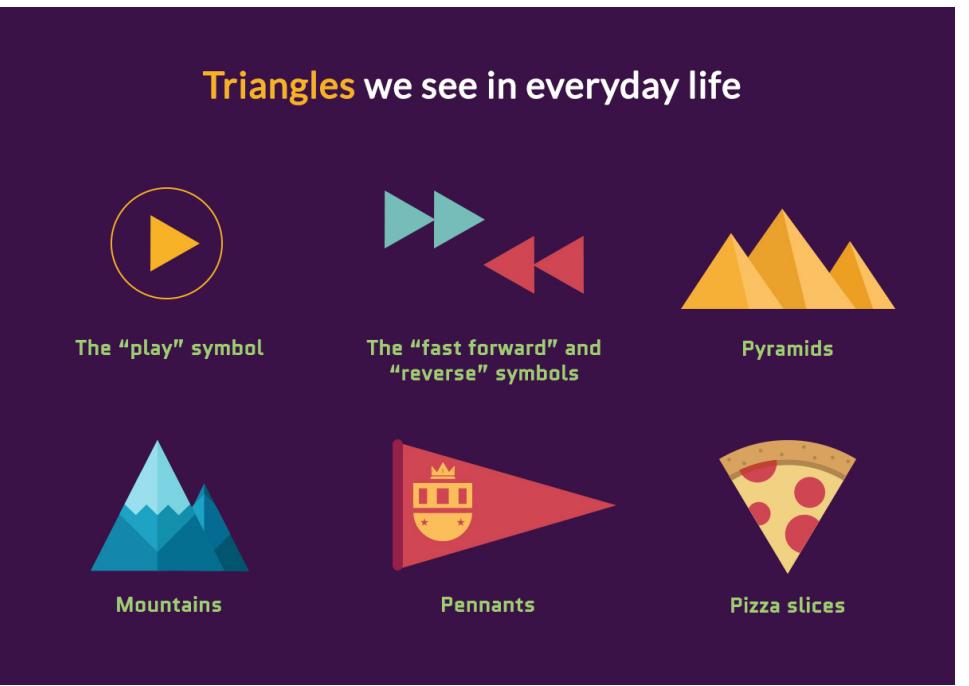

Shape³

Definition: Space outlined by a contour.

- *Organic* vs. *inorganic* shapes

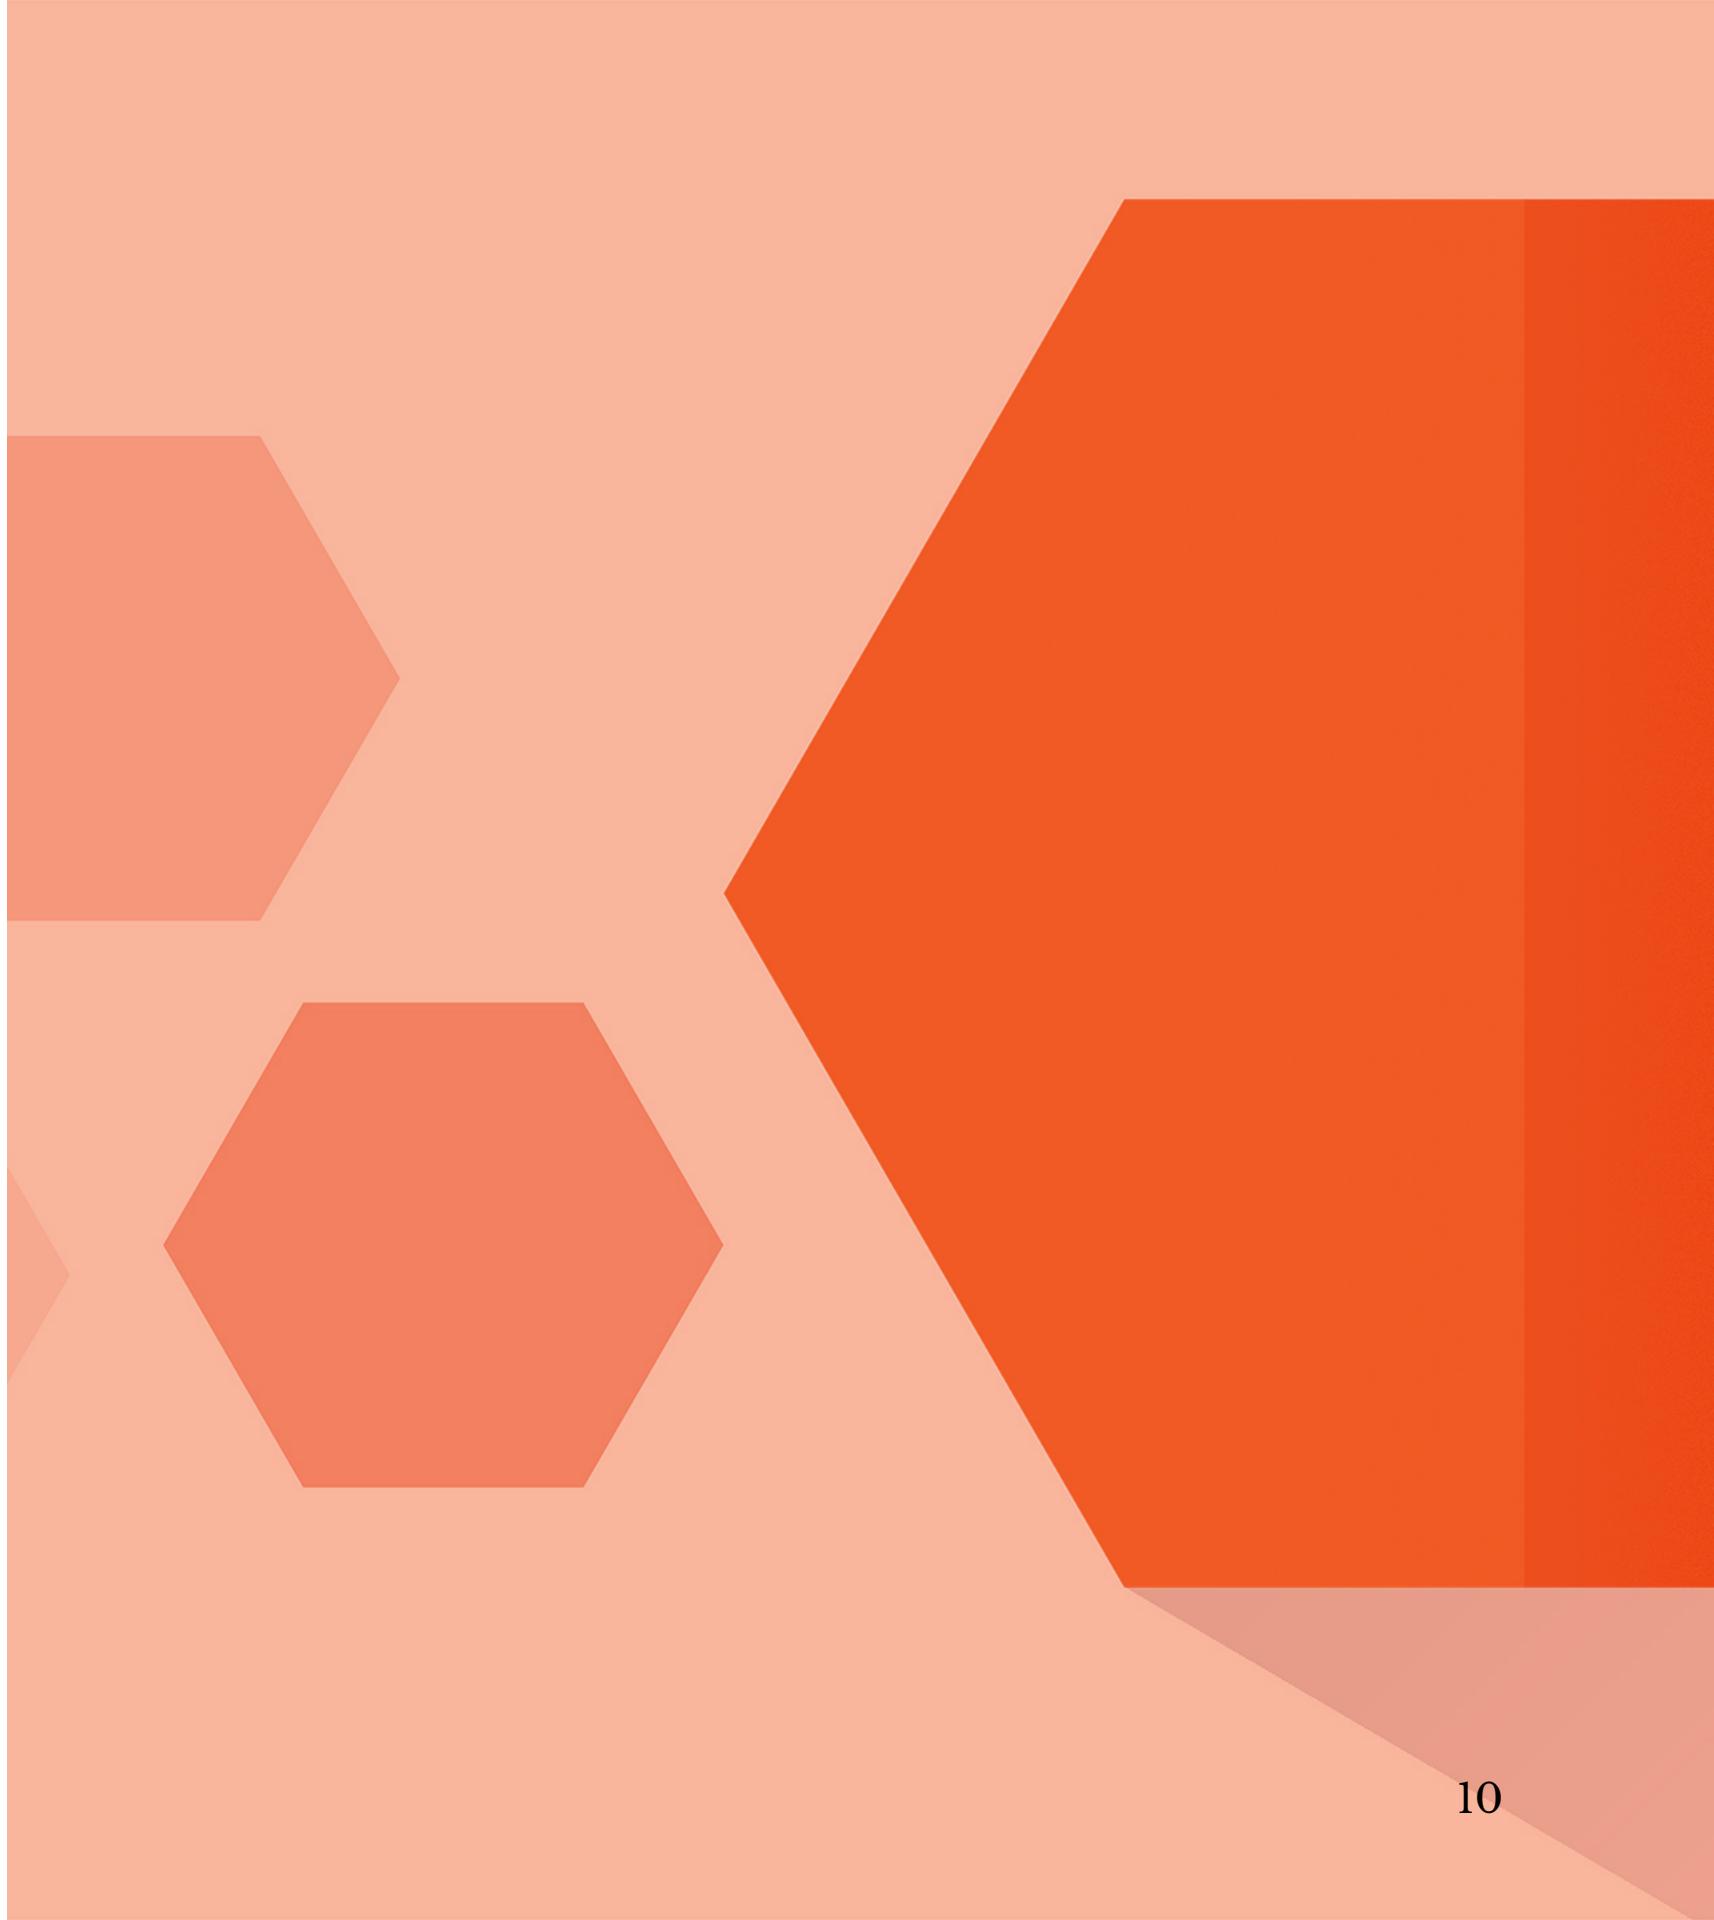

³ Image sources: [this](#) & [next slides](#)

Size⁴

Definition: Size, or *scale*, is the relative extent of the design elements such as shapes and lines.

⁴Image source

Pattern⁵

Definition: Pattern, or *repetition*, systematic duplication of other design elements such as shapes and lines.

⁵ Image source

Texture⁶

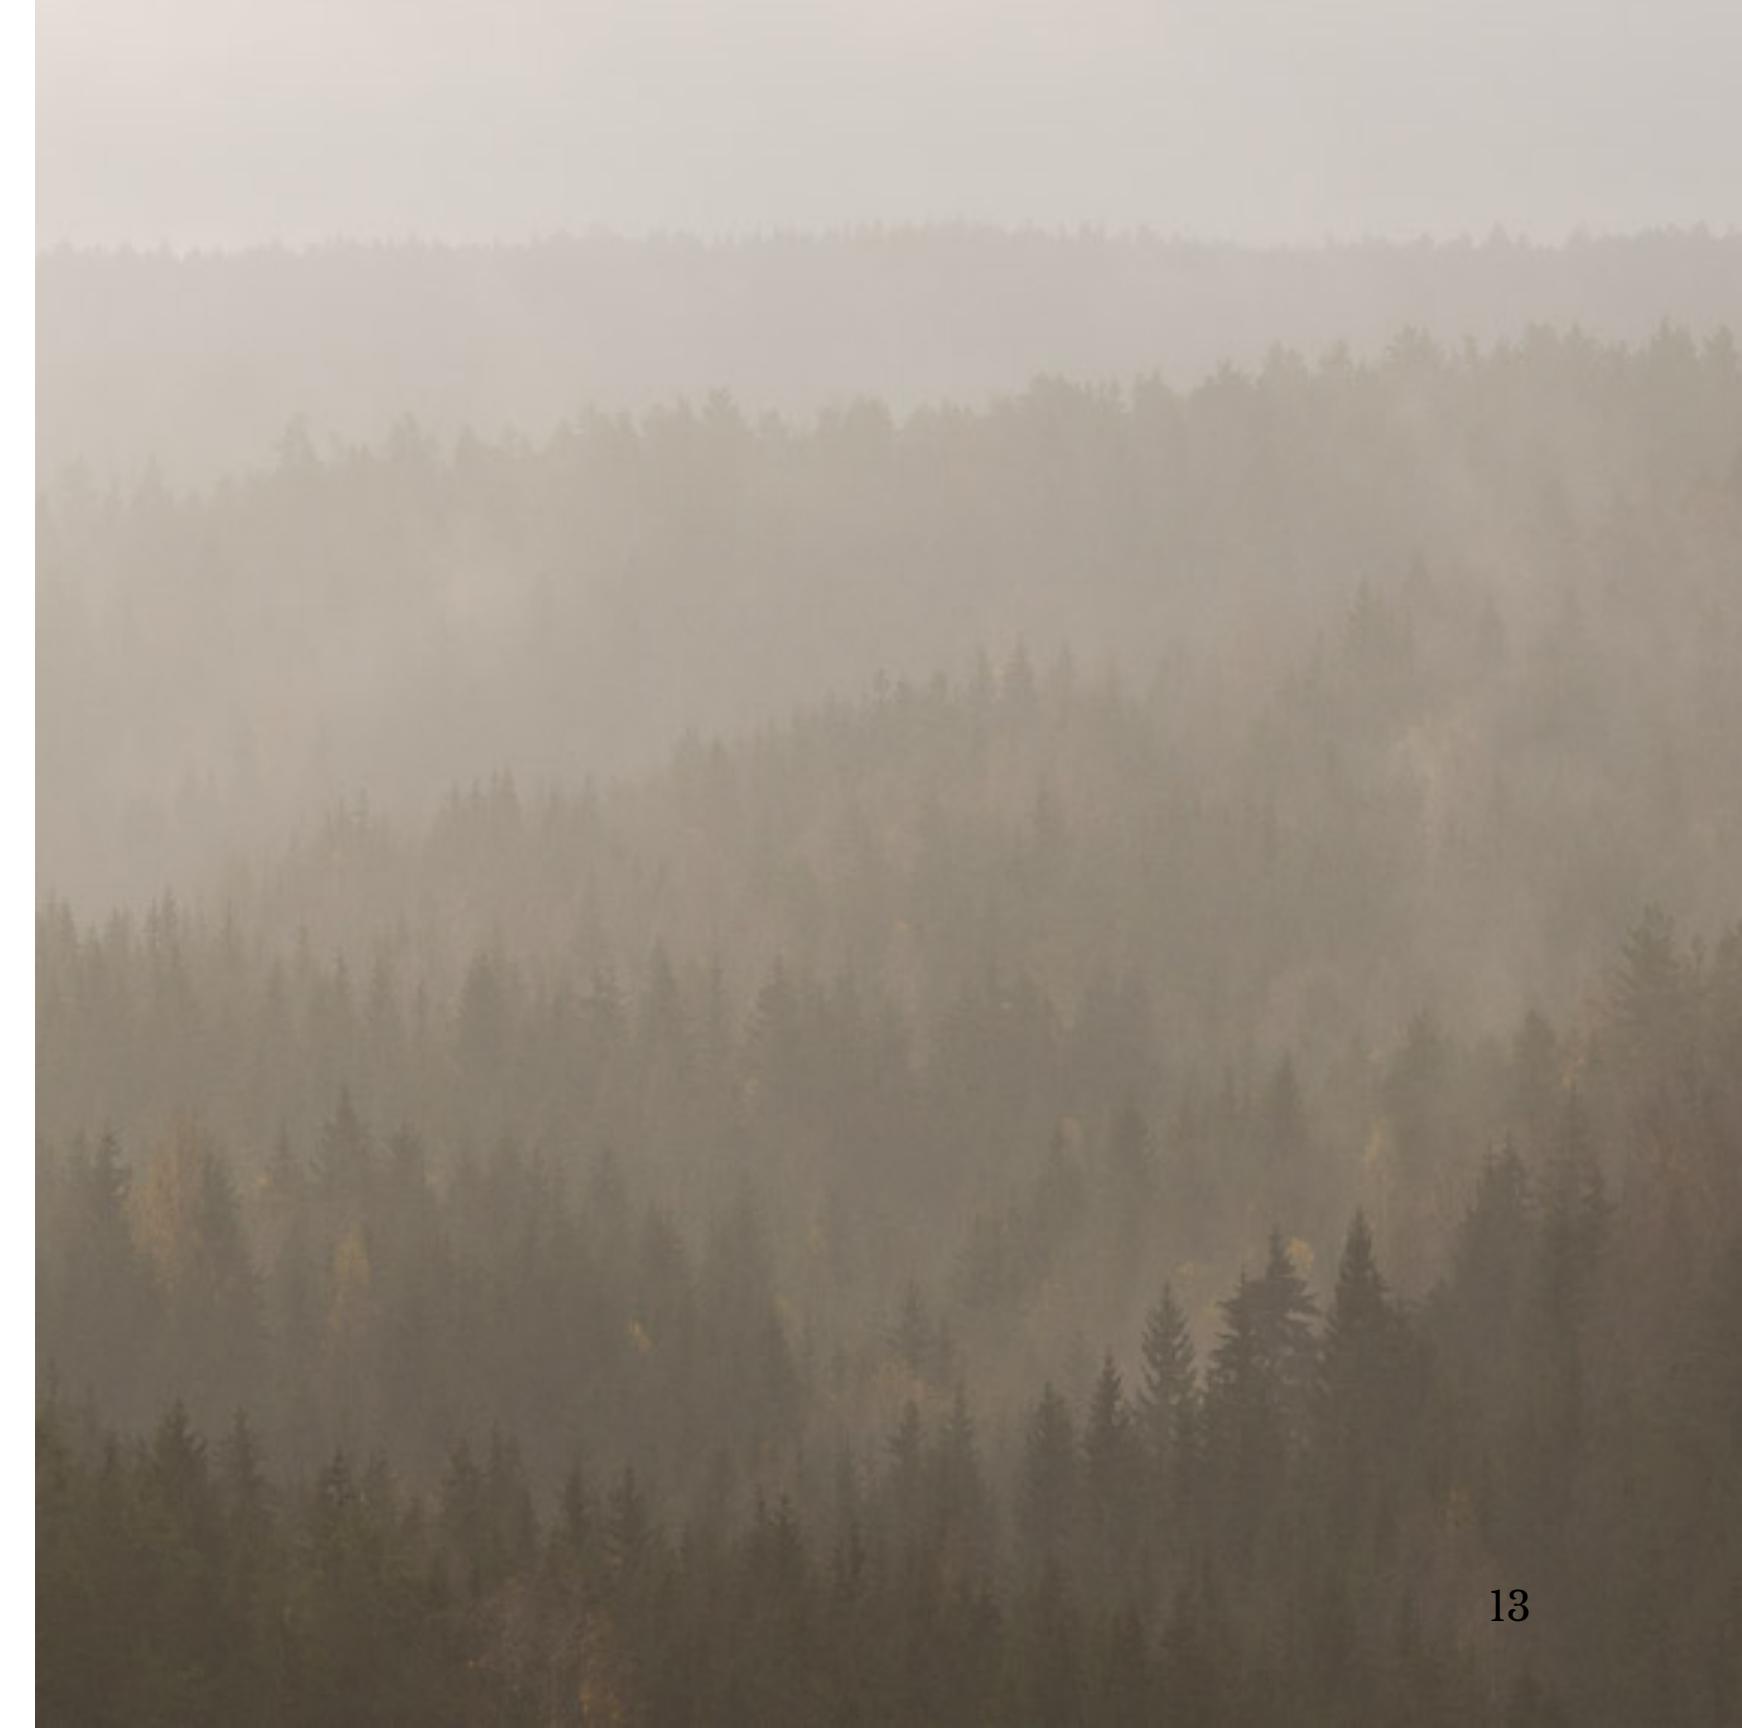

Definition: Tactile and visual quality of a shape or space made up of different colors, materials, and different structures.

⁶Image source

Value⁷

Definition: The intensity in which a design elements is expressed.

⁷ Image source

Questions about *Design Elements*?

Principles of Design

Principles of Design

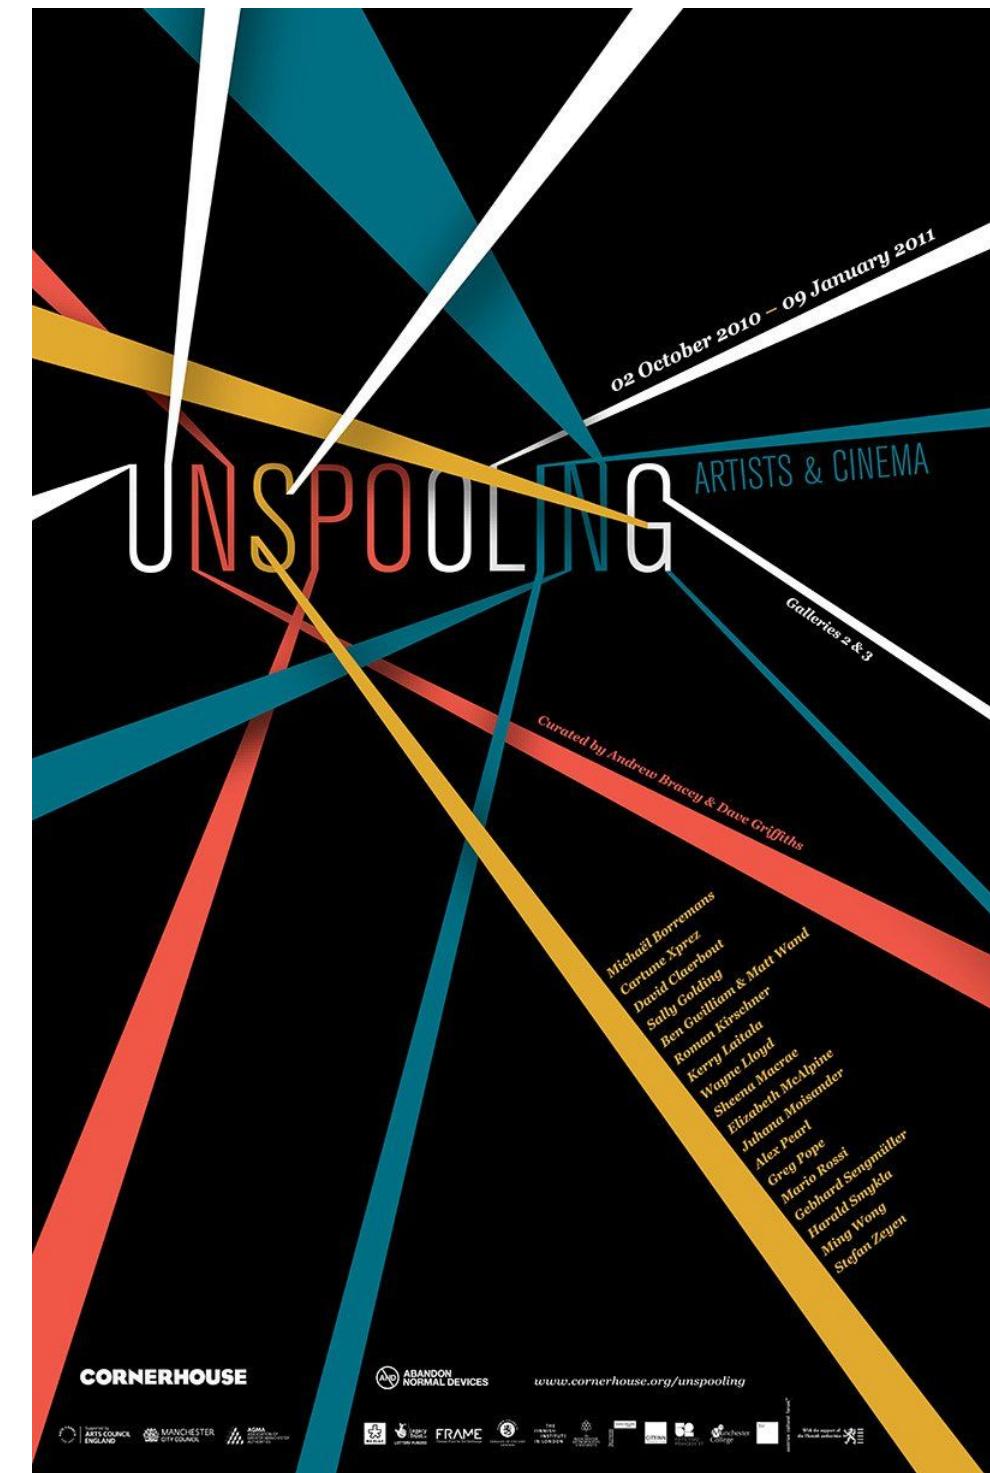

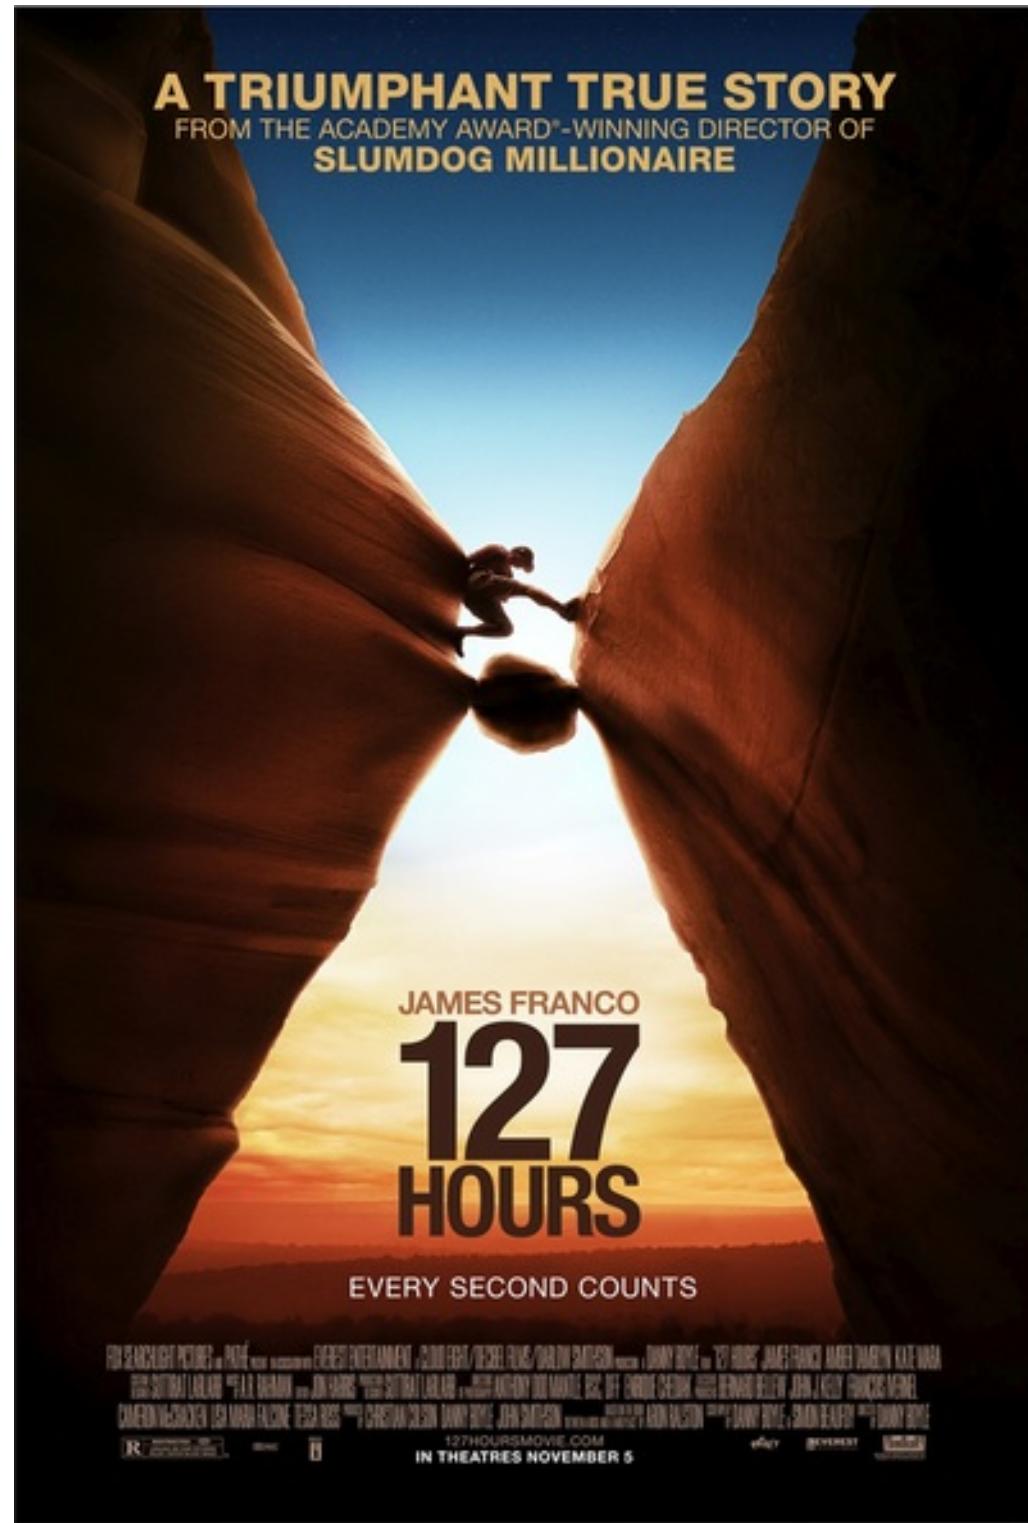

1. Focal Point
2. Contrast
3. Balance
4. Movement
5. Rhythm
6. Perspective
7. Unity

Focal Point⁸

Definition: Focal point, or the area of visual interest, is where the design directs the attention of the viewer first.

⁸Images sources: [this slide](#), next slide: [left](#), [right](#)

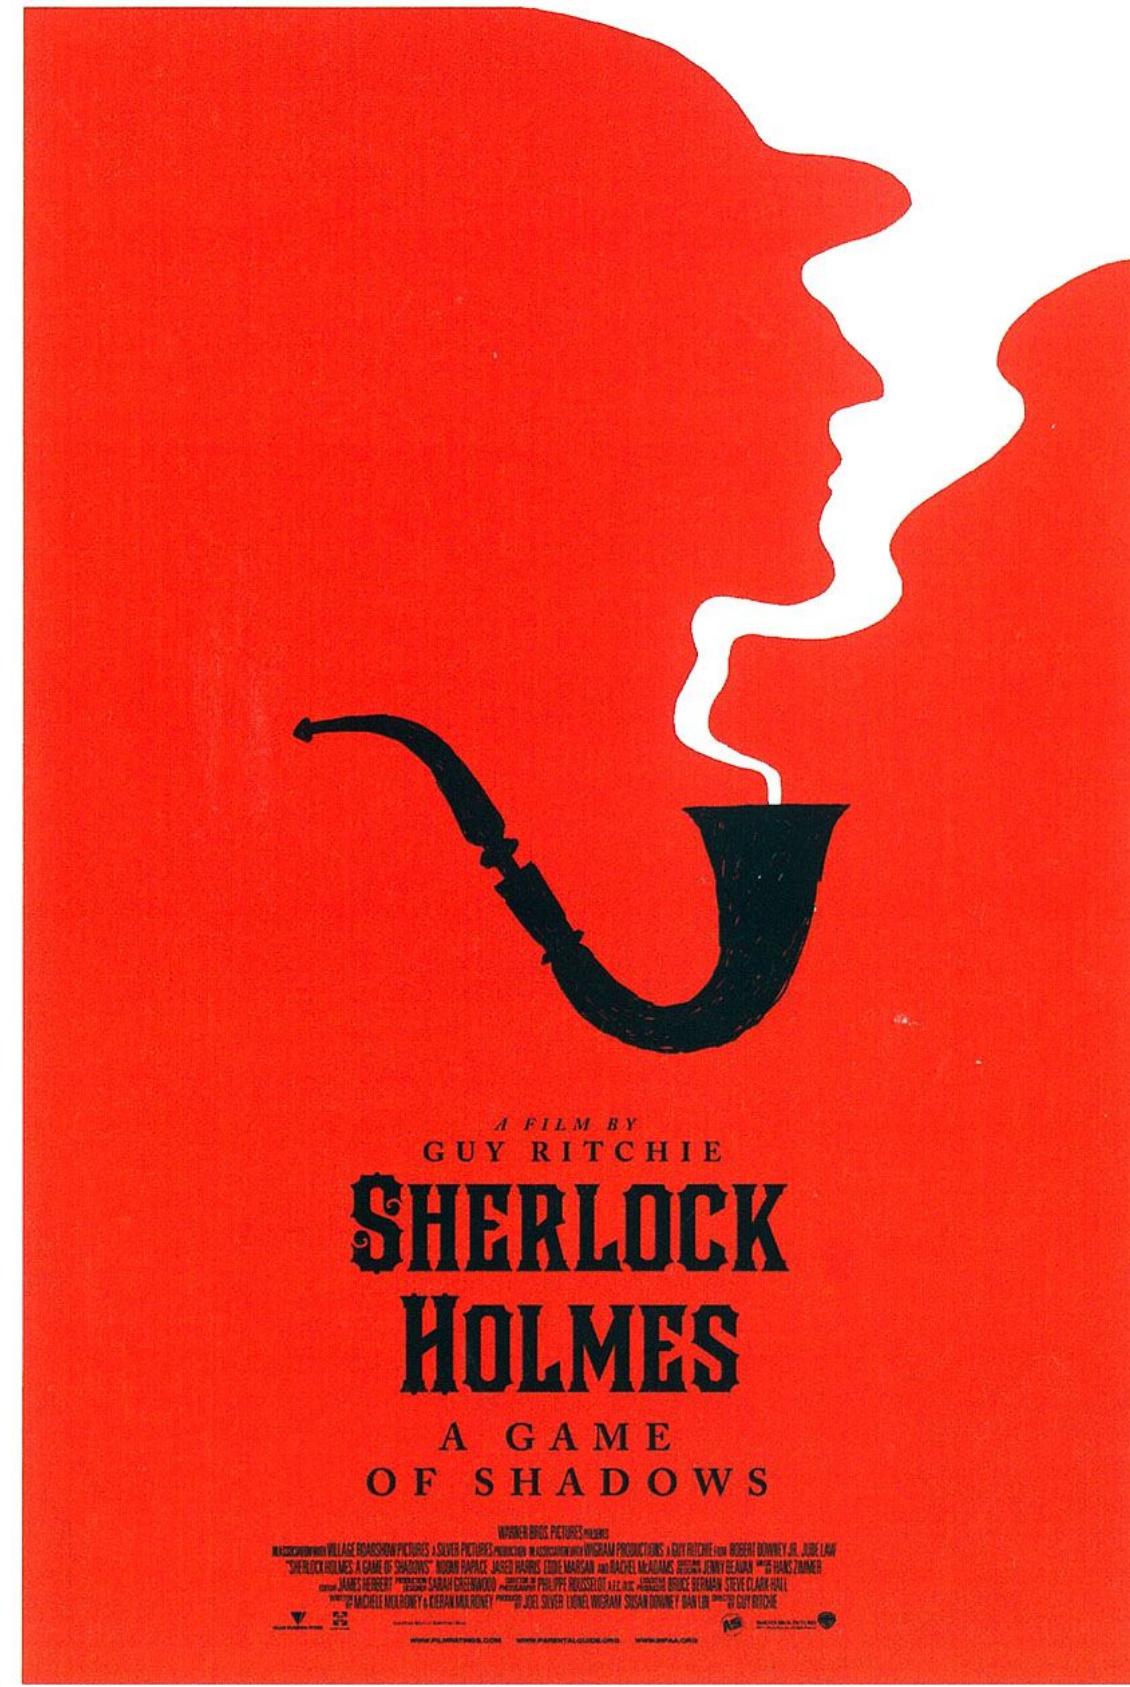

Contrast⁹

Definition: Contrast, or emphasis, is the juxtaposition of design elements that strikingly differ from each other to guide user attention and action.

⁹ Image sources: [this slide](#), next slide: [left](#), [right](#)

Balance¹⁰

Definition: The organization of design elements on a canvas to provide a sense of visual balance or imbalance.

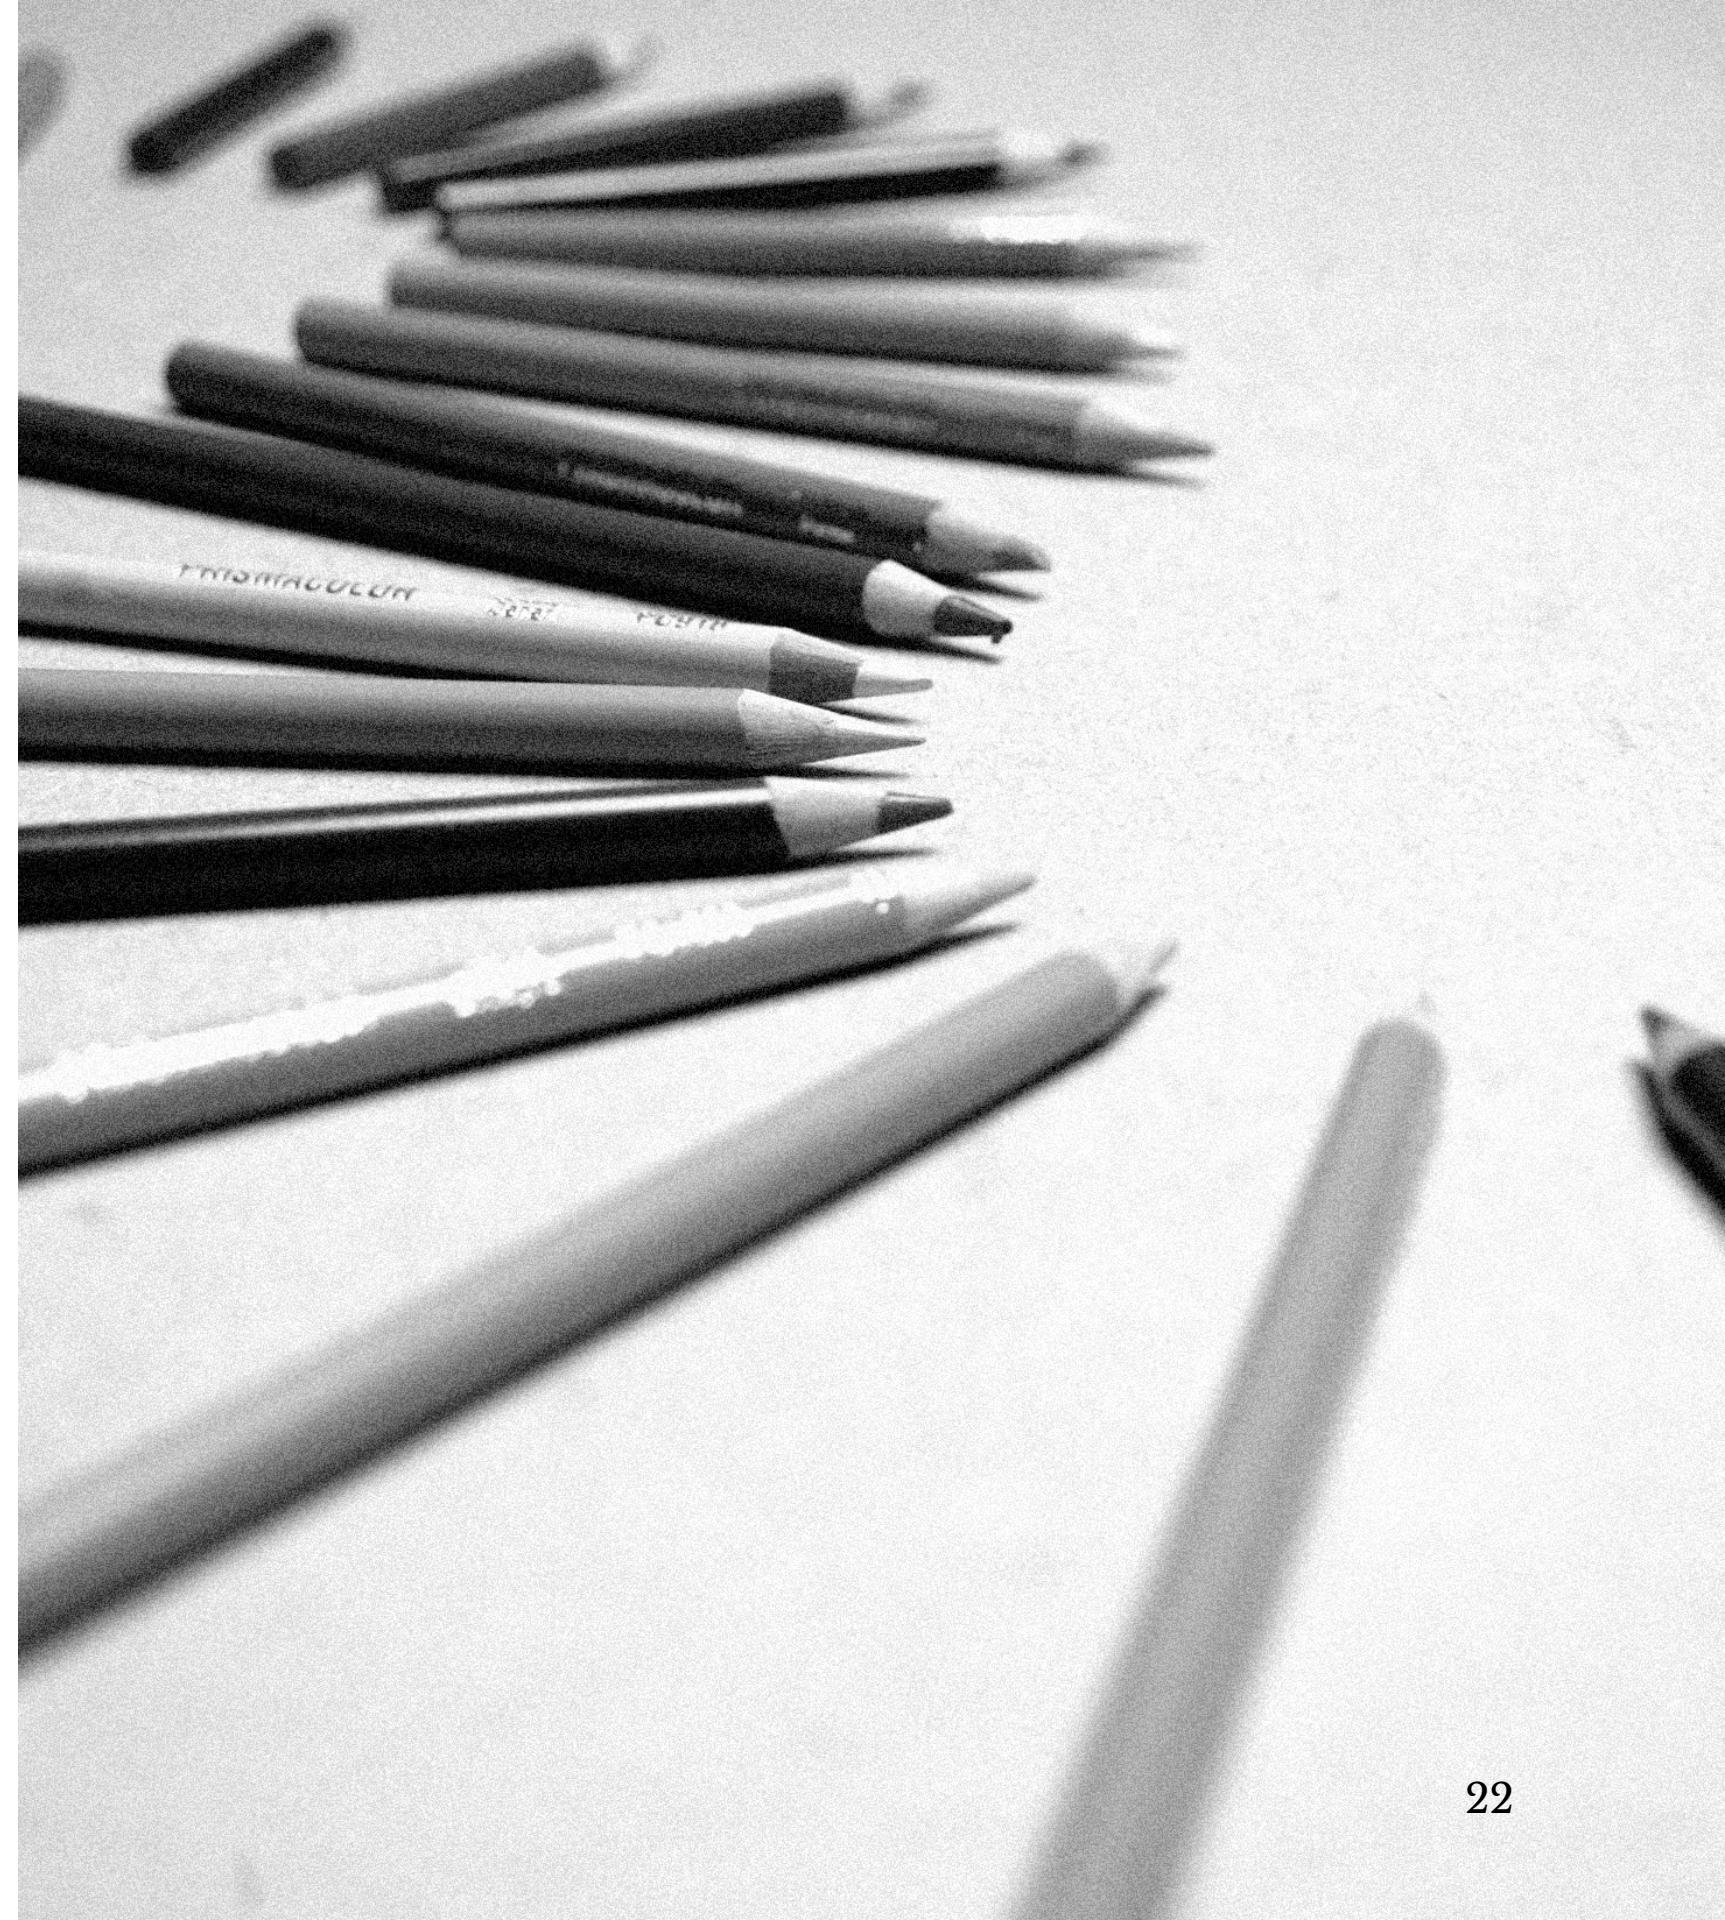

Pro Tip: Balance can be achieved through *symmetry* or *asymmetry*.

¹⁰ [Image source](#)

Movement¹¹

Definition: The organization of design elements in a way that suggests a particular flow on the canvas to direct the user's attention in a particular pattern.

¹¹ [Image source](#)

Rhythm¹²

Definition: Patterned use of design elements in a way that communicates movement or order.

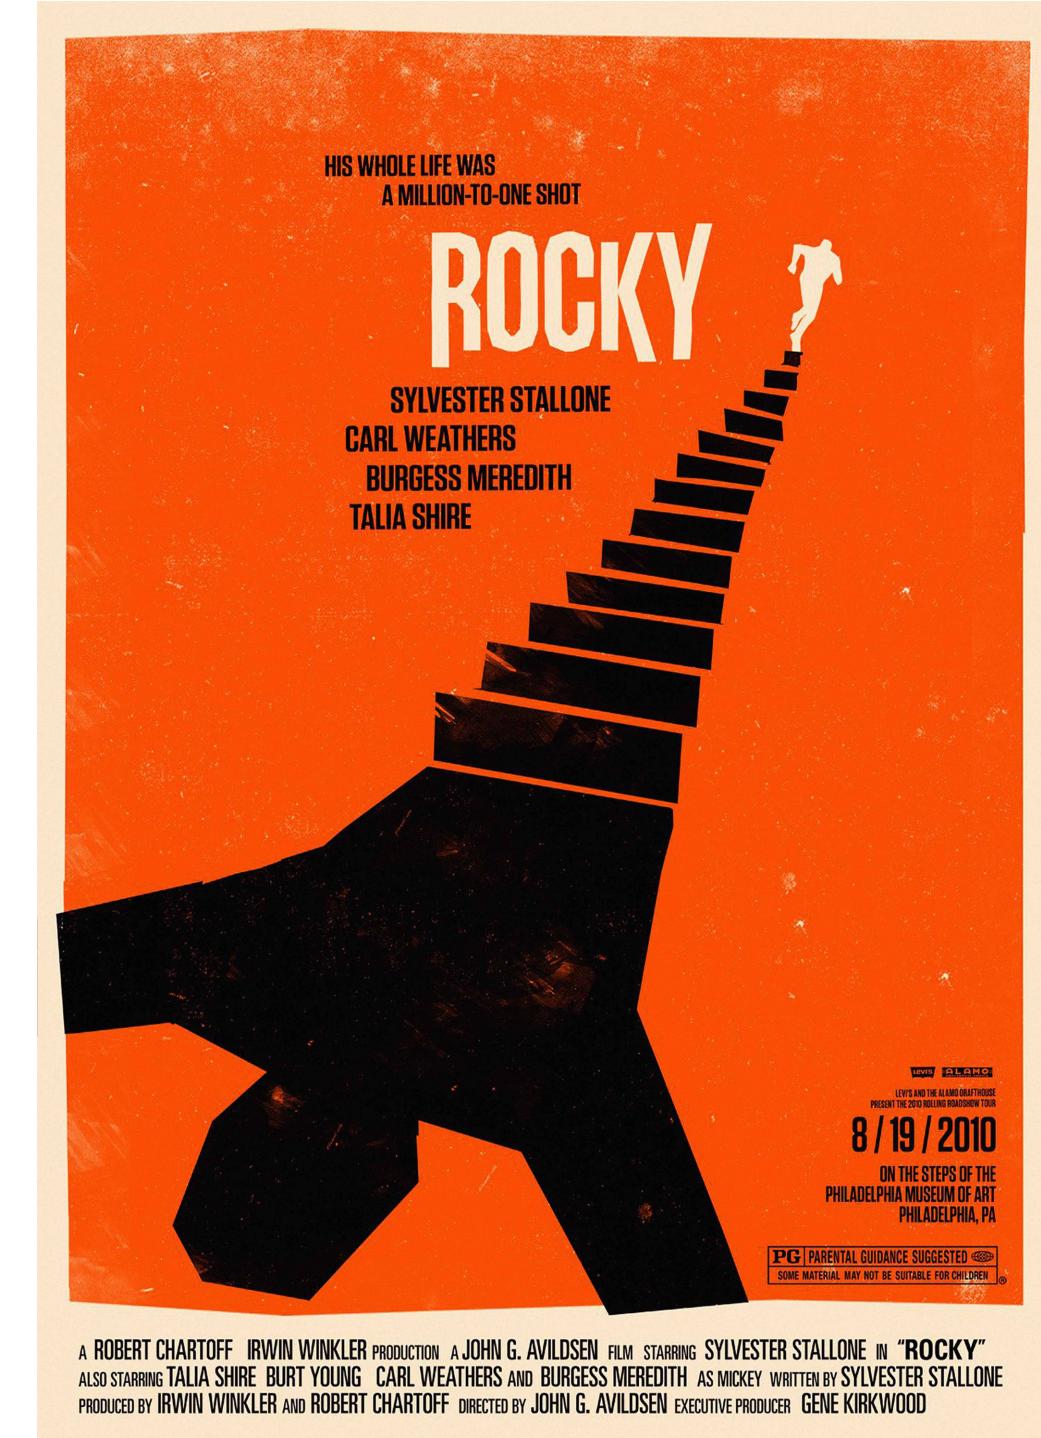

¹² [Image source](#)

Perspective¹³

Definition: Creating a sense of horizon and movement along the depth axis of canvas.

¹³ Image sources: [this slide](#), next slide: [left](#), [right](#)

Unity¹⁴

Definition: Unity reflects the holistic consistency in the use of design elements.

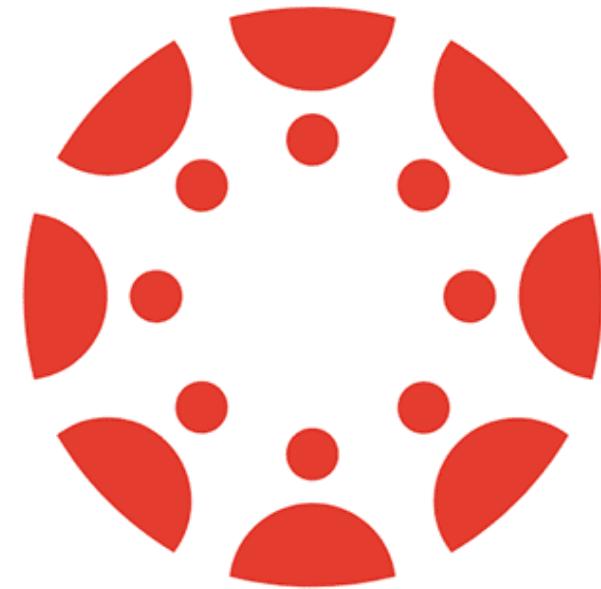

¹⁴ Image sources: [this slide](#), next slide: [left](#), [right](#)

Quiz 1

Complete the Canvas quiz.

canvas

Questions about *Design Principles*?

**This all sounds good. But
how do we actually use
these?**

Some Strategies

- Create *cheat sheets*, and *checklists*
- Analyze existing designs using these tools to build visual analysis skills
- *Practice* designing using the principles
 - *Pro Tip:* Your canvas should have no elements that do not follow an overall principle

In-class Design Exercise 1

Analyze an existing page using the design elements and principles

- What elements, principles can you see in use?
- What problems do you see that can be addressed using design principles?

Make a copy of the Google Drawings template, annotate, and submit a PDF within 24 hours as *Quiz 4*.

The screenshot shows the homepage of the Wisconsin State Journal. At the top, there's a navigation bar with links for News, Sports, Food & Fun, Opinion, Obituaries, Politics, and Buy & Sell. On the right, there are buttons for Log In and Become a Member. Below the navigation, the weather is shown as 65° Fair. The main header features the "WISCONSIN STATE JOURNAL" logo with a small capitol building icon. Below the header, there are several news snippets and advertisements. A prominent advertisement for Polo Ralph Lauren is centered, showing two people in beach attire. Below the ad, a news headline reads "Big Ten announces football returning Oct. 23-24". Other news items include "As COVID-19 cases surge, Gov. Tony Evers doesn't rule out extending mask order, other actions" and "Wisconsin clerks work to send out 1 million absentee ballots by Thursday". On the right side, there's a sidebar with a "#AloneTogether" campaign message and a "Trending now" section with two numbered items.

In-class Design Exercise 2¹⁵

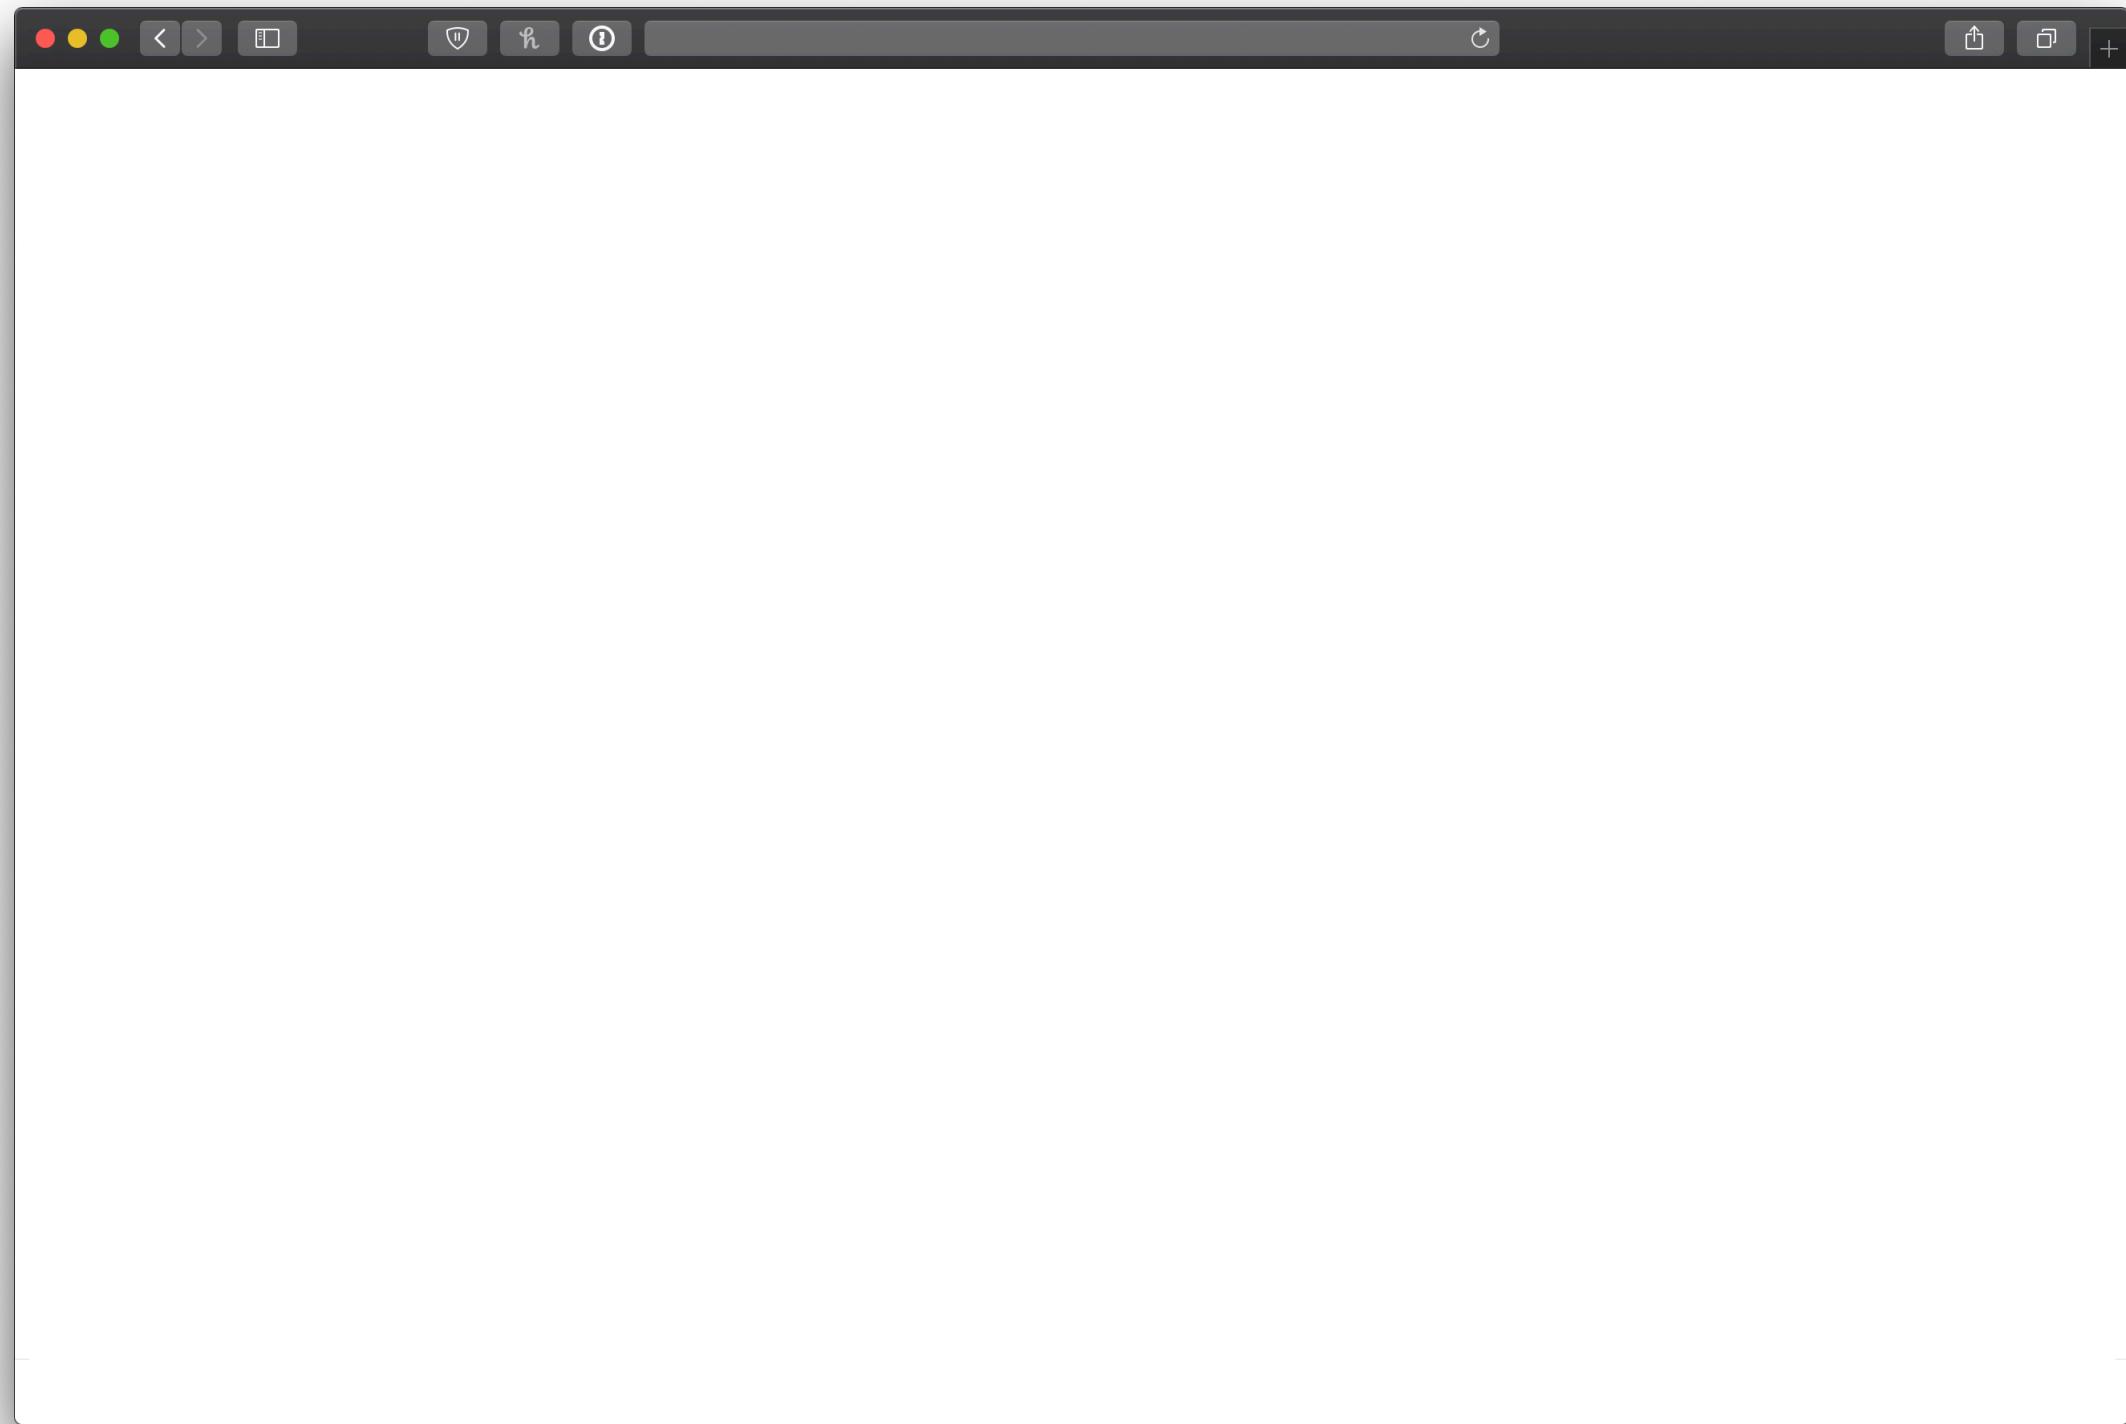

Consider the *last* product you purchased online. Design a product page with the following elements:

- Product photo
- Product description, reviews, similar items
- Action buttons: choose color, add to cart, add to wishlist

Make a copy of the template, place elements & annotate with your decisions, and submit a PDF as *Quiz 4*.

¹⁵ Image sources: [this slide](#), elements/principles: [first](#), [second](#)

The Elements of Design

(the tools to make art)

Line		Horizontal, vertical, diagonal, straight, curved, dotted, broken thick, thin.
Shape		2D (two dimensional)/ flat Geometric (square, circle, oval, triangle) Organic (all other shapes)
Form		3D (three dimensional), Geometric (cube, sphere, cone), Organic (all other forms such as: people, animals, tables, chairs, etc).
Colour		Refers to the wavelengths of light. Refers to hue (name), value (lightness/darkness), intensity (saturation, or amount of pigment), and temperature (warm and cool). Relates to tint, tone and shade.
Value		The lightness or darkness of an image (or part of an image).
Texture		The feel, appearance, thickness, or stickiness of a surface (for example: smooth, rough, silky, furry).
Space		The area around, within, or between images or parts of an image (relates to perspective). Positive and negative space.

The Principles of Design

(how to use the tools to make art)

Pattern		A regular arrangement of alternated or repeated elements (shapes, lines, colours) or motifs.
Contrast		The juxtaposition of different elements of design (for example: rough and smooth textures, dark and light values) in order to highlight their differences and/or create visual interest, or a focal point.
Emphasis		Special attention/importance given to one part of a work of art (for example, a dark shape in a light composition). Emphasis can be achieved through placement, contrast, colour, size, repetition... Relates to focal point.
Balance		A feeling of balance results when the elements of design are arranged symmetrically or asymmetrically to create the impression of equality in weight or importance.
Scale		The relationship between objects with respect to size, number, and so on, including the relation between parts of a whole.
Harmony		The arrangement of elements to give the viewer the feeling that all the parts of the piece form a coherent whole.
Rhythm/Movement		The use of recurring elements to direct the eye through the image; the way the elements are organized to lead the eye to the focal area. The eye can be directed, for example, along edges and by means of shape and colour.
Unity		All parts of an image work together to be seen as a whole.
Variety		Using different elements in an image to create visual interest.

LINE

A line is a mark between two points. There are various types of lines, from straight to squiggly to curved and more. Lines can be used for a wide range of purposes: stressing a word or phrase, connecting content to one another, creating patterns and much more.

COLOR

Color is used to generate emotions, define importance, create visual interest and more. CMYK (cyan/magenta/yellow/black) is subtractive; RGB (red/green/blue) is additive.

Some colors are warm and active (orange, red); some are cool and passive (blue, purple).

There are various color types (primary to analogous) and relationships (monochromatic to triad) worth learning more about as well.

TEXTURE

Texture relates to the surface of an object; the look or feel of it. Concrete has a rough texture; drywall has a smooth and subtle texture. Using texture in design is a great way to add depth and visual interest. Printed material has actual, textile texture while screen material has implied texture.

paper leaf

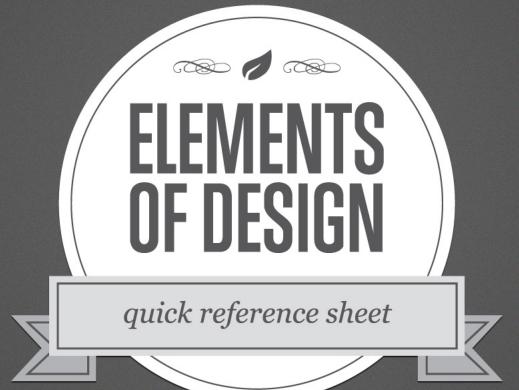

created by Paper Leaf Design. www.paper-leaf.com

SHAPE

Height + width = shape. We all learned basic shapes in grade school - triangles, squares, circles and rectangles. Odd or lesser seen shapes can be used to attract attention.

There are three basic types of shape: geometric (triangles, squares, circles etc), natural (leaves, animals, trees, people), and abstracted (icons, stylized, graphic representations etc).

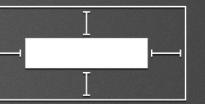

SIZE

Size is how small or large something is: a small shirt vs. an extra large shirt, for example. Use size to define importance, create visual interest in a design (via contrasting sizes), attract attention and more.

VALUE

Value is how light or how dark an area looks. A gradient, shown above, is a great way to visualize value - everything from dark to white, all the shades in-between, has a value. Use value to create depth and light; to create a pattern; to lead the eye; or to emphasize.

Space is the area around or between elements in a design. It can be used to separate or group information. Use it effectively to: give the eye a rest; define importance; lead the eye through a design and more.

SPACE

CONTRAST

COLOR

TONE/VALUE

SIZE/SHAPE

DIRECTION

Unique elements in a design should stand apart from one another. One way to do this is to use contrast. Good contrast in a design - which can be achieved using elements like color, tone, size, and more - allows the viewer's eye to flow naturally.

To the left, you can see 4 ways to create contrast in your design.

ALIGNMENT

Proper alignment in a design means that every element in it is visually connected to another element. Alignment allows for cohesiveness; nothing feels out of place or disconnected when alignment has been handled well.

REPETITION

Repetition breeds cohesiveness in a design. Once a design pattern has been established - for example, a dotted border or a specific typographic styling - repeat this pattern to establish consistency.

The short version?

Establish a style for each element in a design and use it on similar elements.

PROXIMITY

Imagine how ridiculous it would be if the proximity icons on this graphic were located on the other side of this document.

canvas

Key Components for UX Design

Key Components for UX Design

We will focus on *type*, *color*, and *images*.

Type

Definition: Printed letters and characters of language.

Associated Concepts

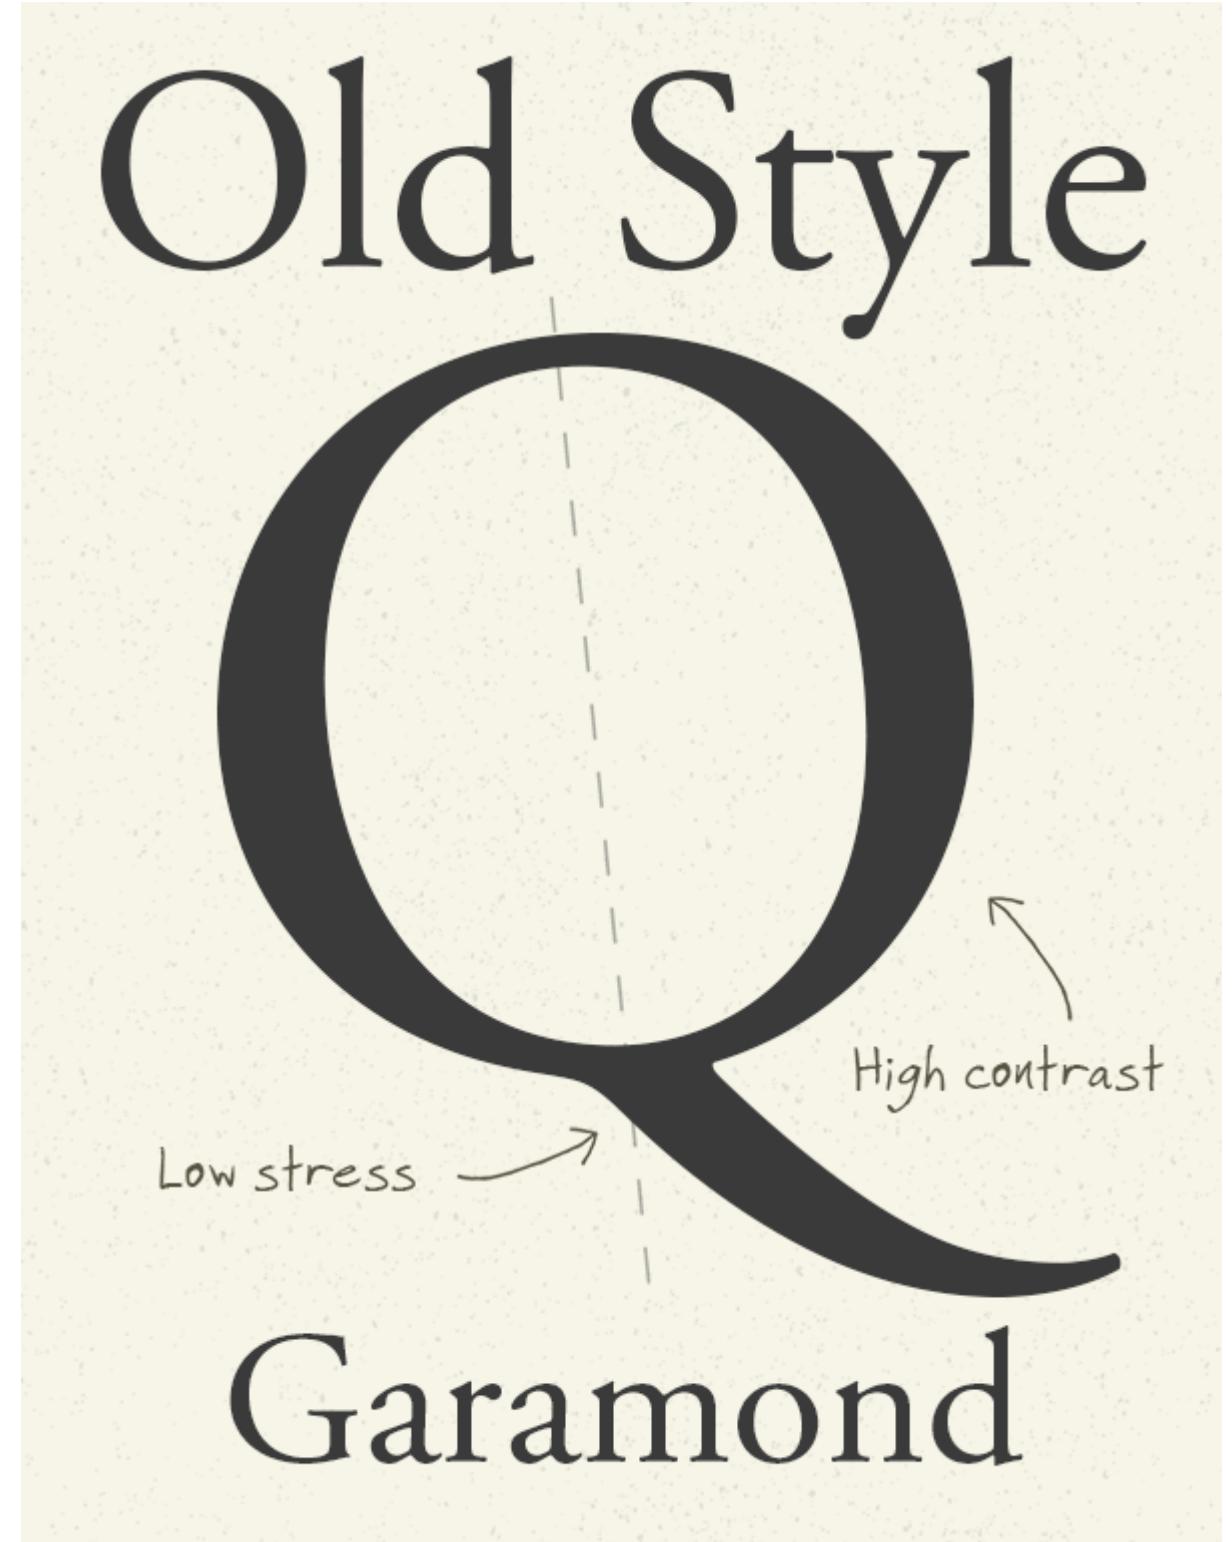

- A **font** is the style in which type is created.
- A **typeface** is a font family that includes fonts of different variations that follow the same style.
- A **glyph** is a particular character.

Categories of Typefaces

1. Old style
2. Modern
3. Slab serif
4. Sans serif
5. Script
6. Decorative

Old-style fonts

Definition: Old-style fonts have "serifs" at the tips of a glyph that taper closer to the tip.

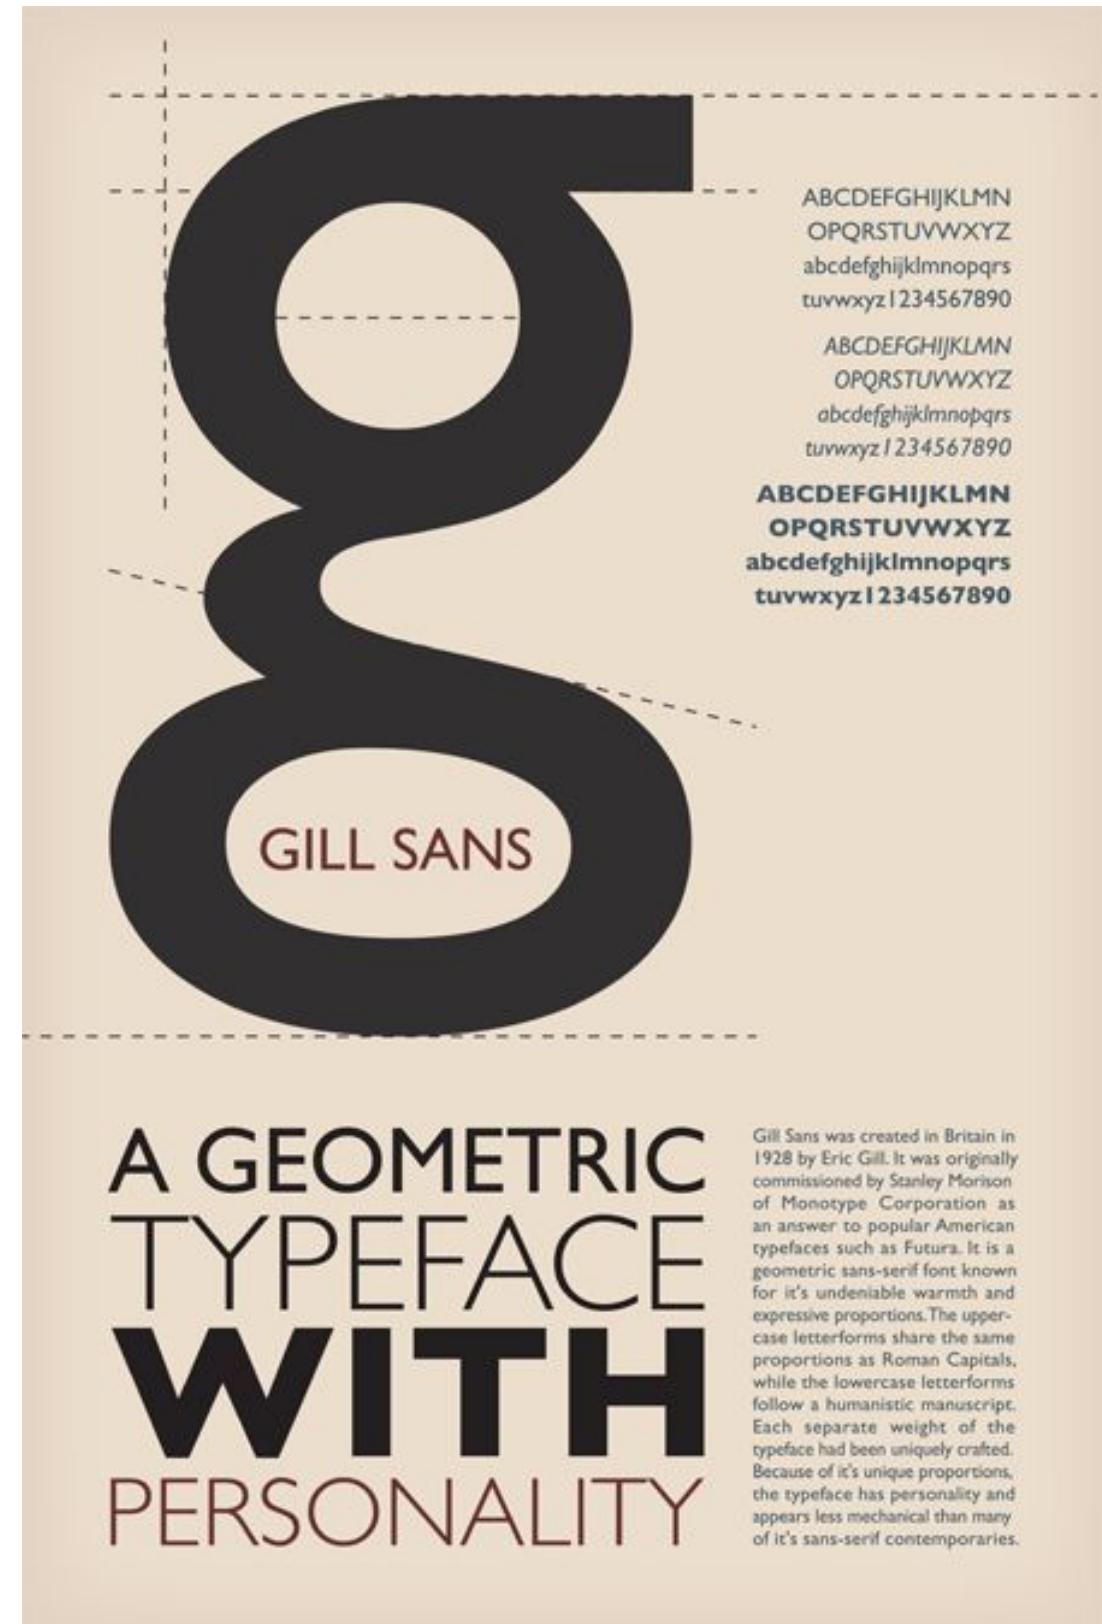

Modern & slab-serif fonts

Definition: Modern and slab-serif fonts have very thin or very thick serifs.

Sans-serif fonts

Definition: Sans-serif fonts lack the serif at the tips of the glyphs, and their strokes follow uniform weight.

Script fonts

Definition: Script fonts simulate cursive writing where glyphs connect with each other at the downstroke.

Decorative fonts

Definition: Decorative fonts are designed specifically to convey a particular context or elicit a particular feeling, e.g., "gothic."

Font parameters

- **Style variations:** bold, italic, oblique
- **Caps:** all caps, small caps
- **Weight:** extra light, light, medium, bold

Muller™ Styles Overview
Weights

Hairline & Hairline Italic

Antimon

Thin & Thin Italic

Beryllium

UltraLight & UltraLight Italic

ExtraBold & ExtraBold Italic

Kohlenstoff

Black & Black Italic

Wolfram

Heavy & Heavy Italic

Seaborgium

Pro Tip: Type alone can be used to achieve design principles, such as hierarchy and movement.

You'll probably see this last.

First, you'll read this.

Then, you'll read this.

And then this.

Pro tip: For good typography, become familiar with *leading*, *tracking*, *kerning*, *widows*, *orphans*, *rags*, *rivers*.

kerning
tracking
leading
point size
typeface
justification
line width

what is typography?

Questions about Type?

Color

Definition: Human visual perception of light reflecting from an object.

- Creates emphasis
- Organizes content
- Evokes emotion

Marketing Proposal

Digital Content Team

Client: UNIVERSITY OF WATERLOO

Presented by: GEORGE ZANDER

“Don’t settle: Don’t finish crappy books. If you don’t like the menu, leave the restaurant. If you’re not on the right path, get off it.”

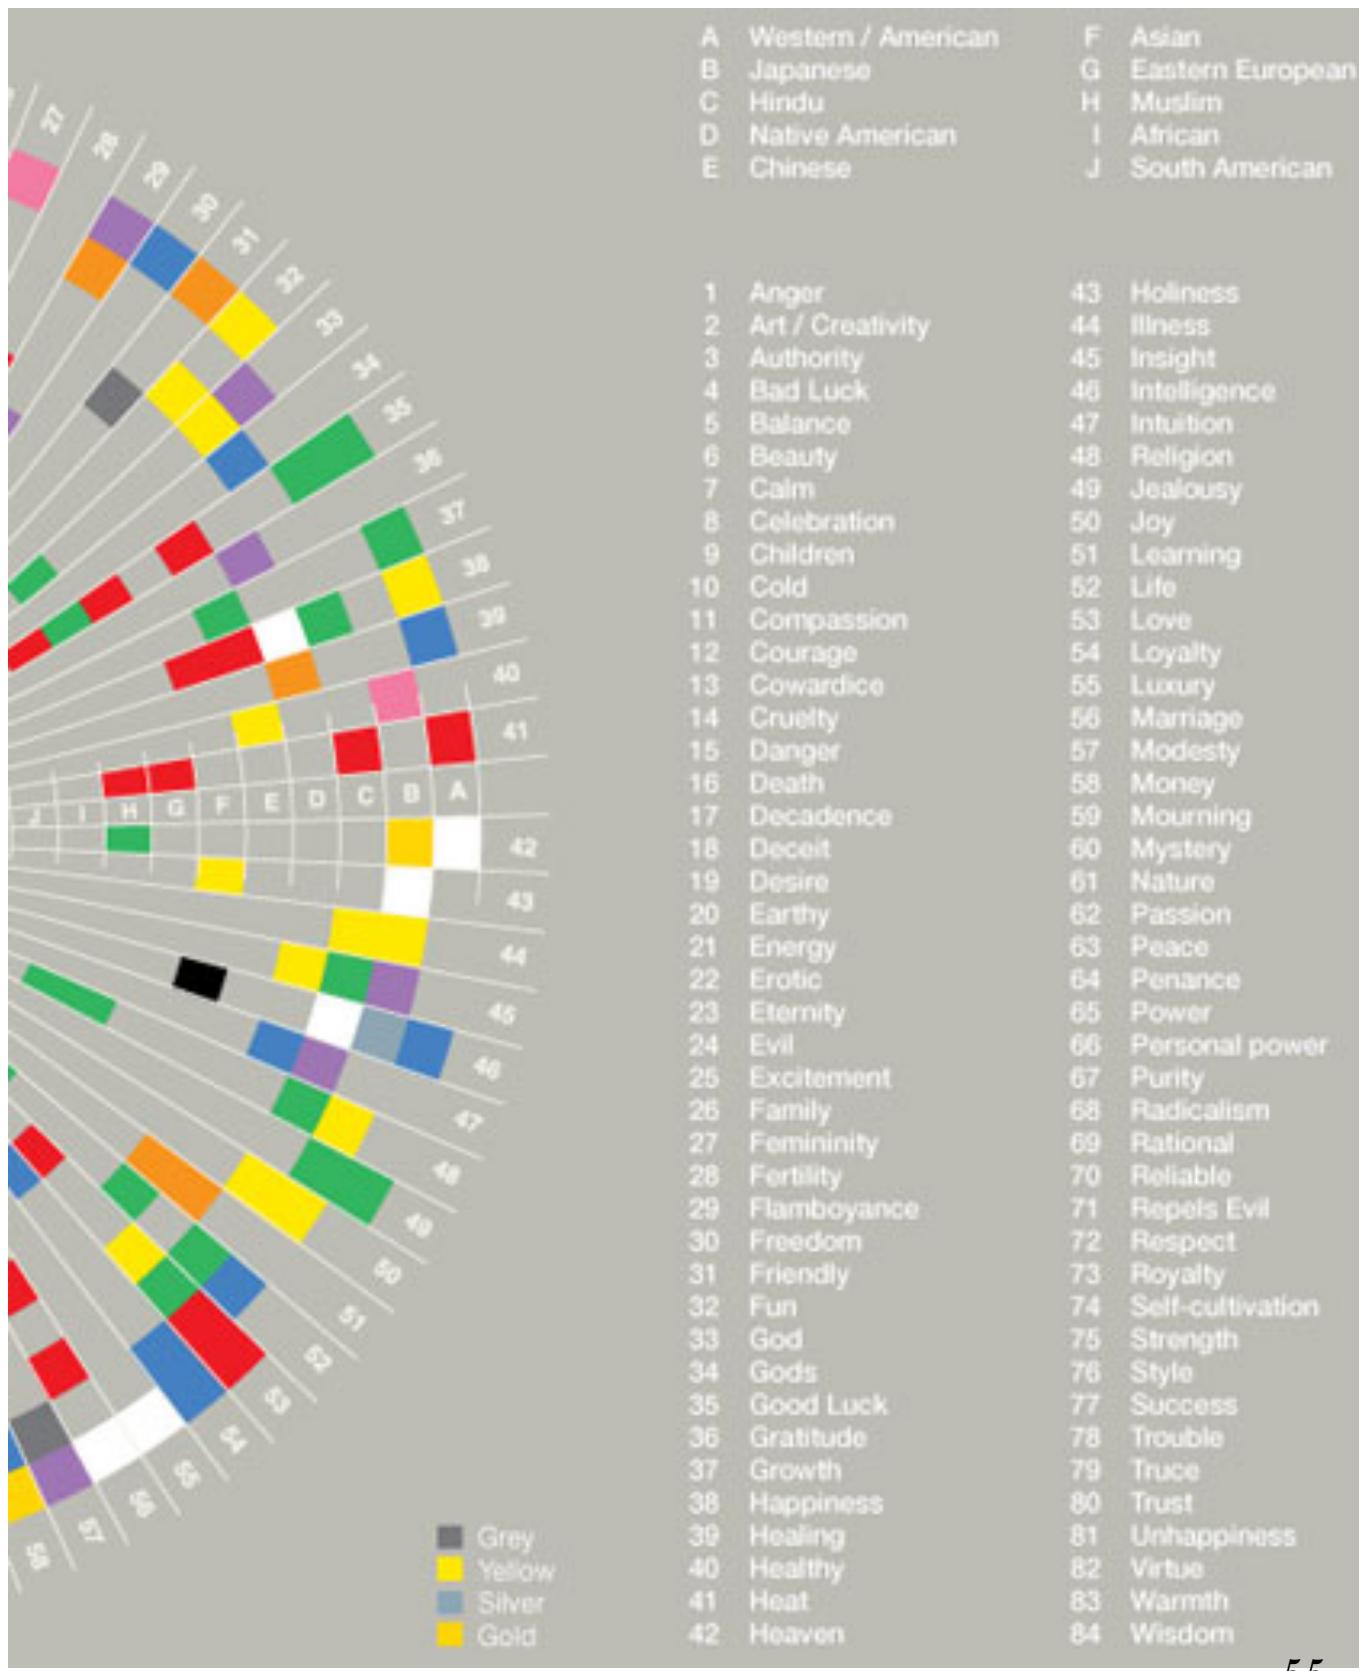

Our Objectives

- To develop creative, high-impact executions that reach large groups of consumers and maximize viewership.
- To deliver cost effective business to consumer communications that builds a strong consumer relationship.

Our Overview

Your marketing plan should start with an executive summary. The summary gives a quick overview of the main points of the plan.

Although the executive summary appears at the beginning of the plan, you should write it last. Writing the summary is a good opportunity to check that your plan makes sense and that you haven’t missed any important points.

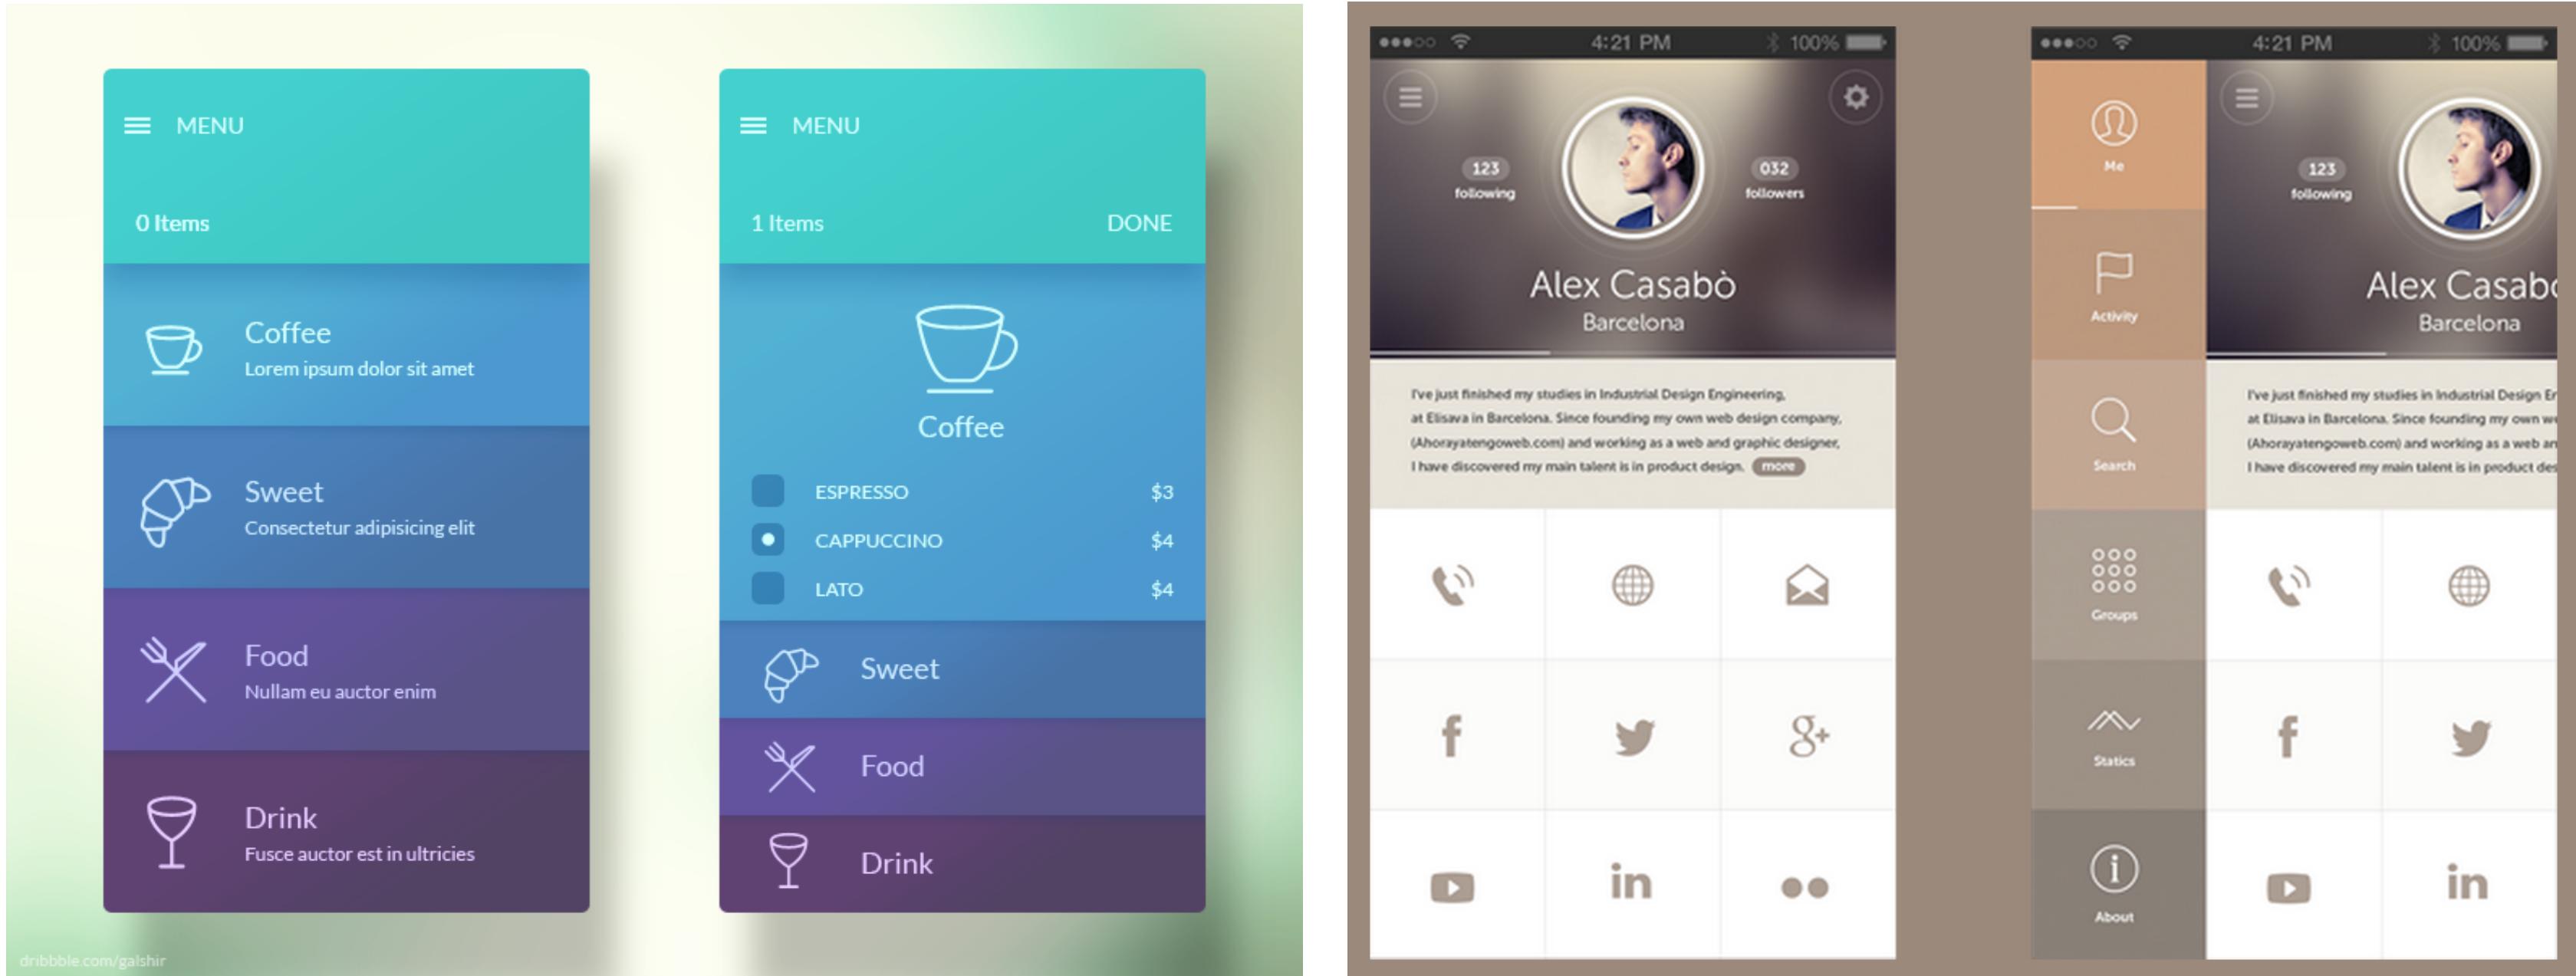

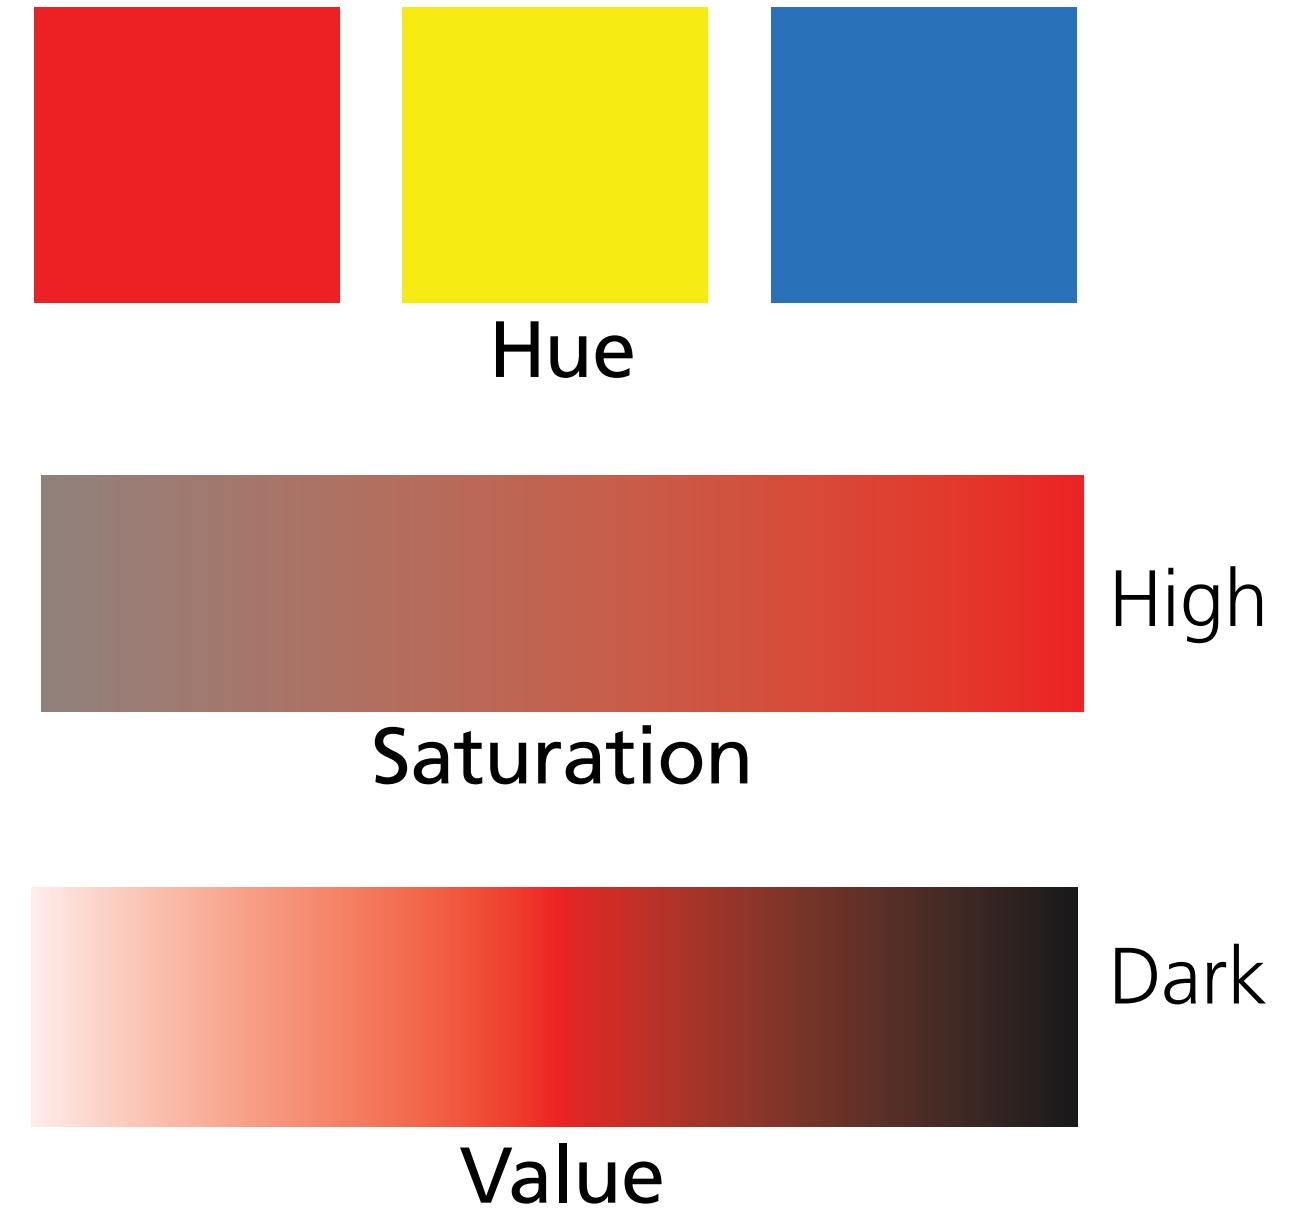

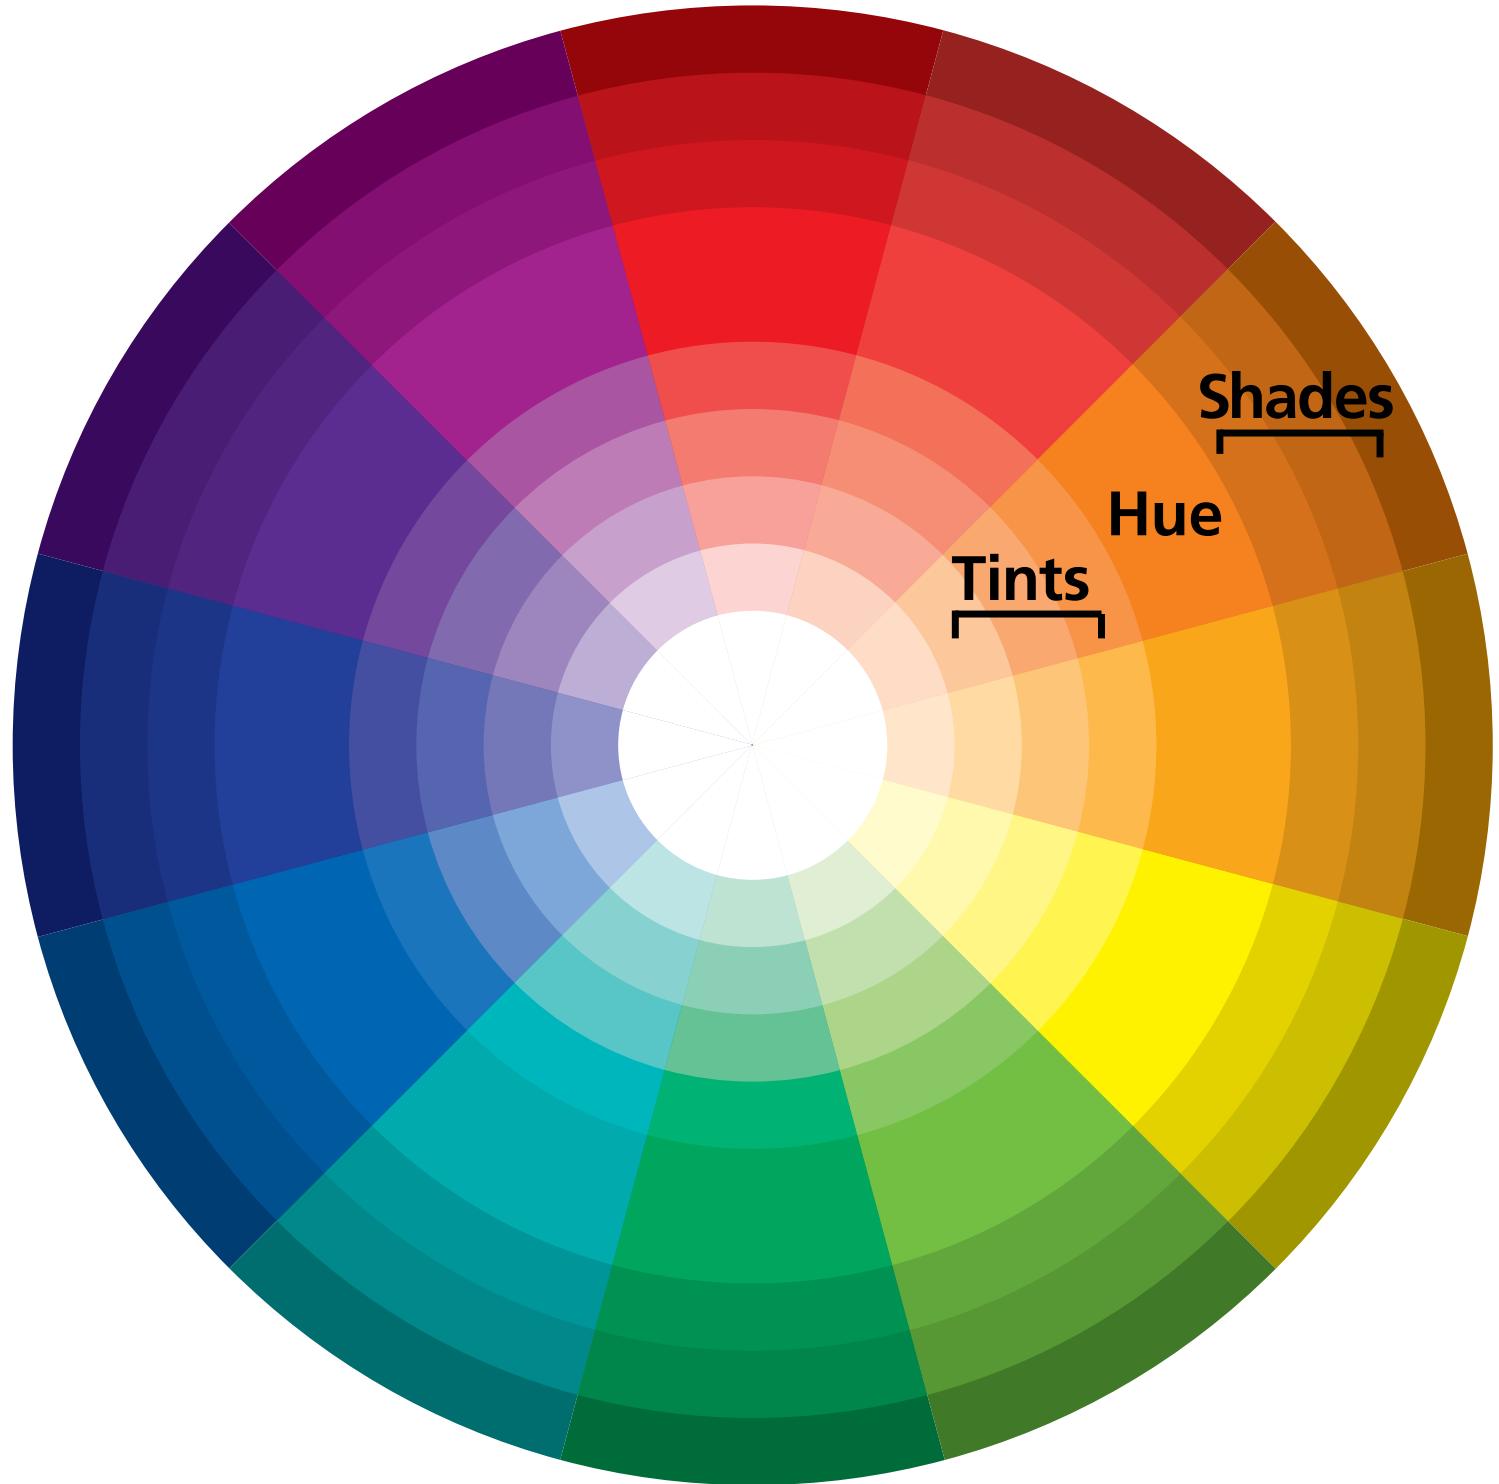

The Color Wheel

- Primary, secondary, tertiary colors
- Tints, hue, shades
- Complementary colors
- Warm, cool colors

The basic colors

UNDERSTANDING COLOR THEORY

Color Palettes

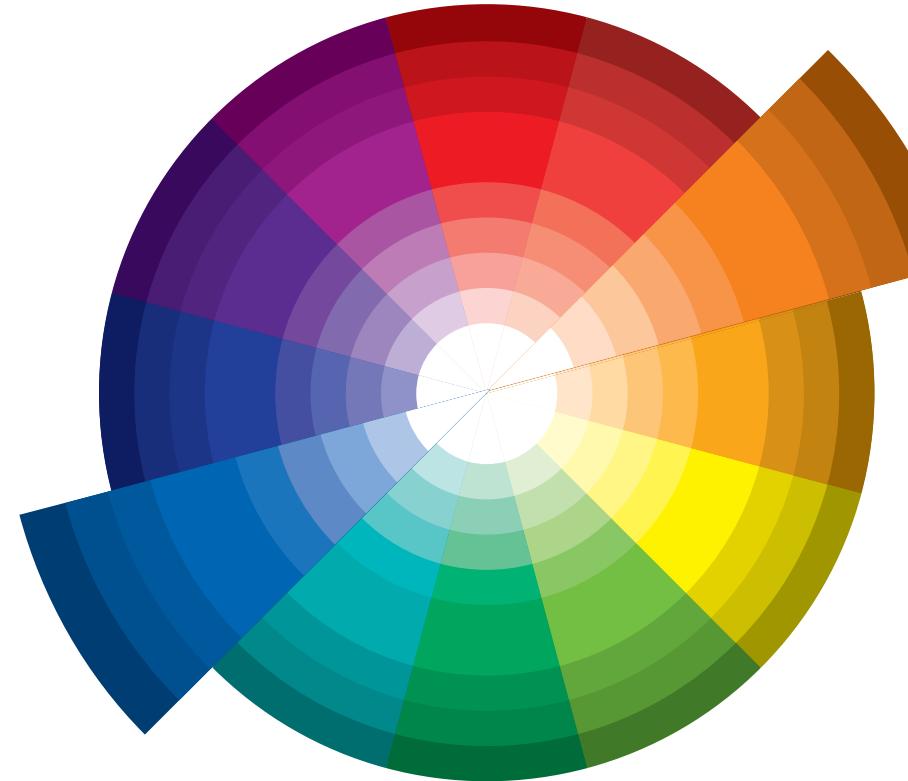

1. Analogous
2. Complementary
3. Split Complementary
4. Triadic
5. Monochromatic
6. Achromatic

ANALOGOUS

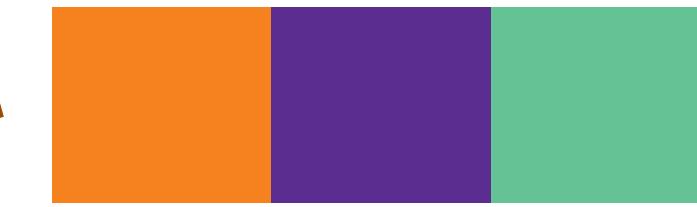

COMPLEMENTARY

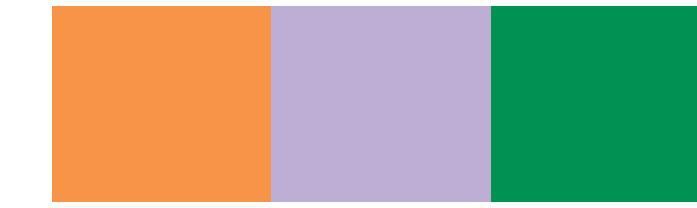

SPLIT-COMPLEMENTARY

TRIADIC

#f5821f #5c2d91 #65c194

#f79447 #bbaed5 #009252

MONOCHROMATIC

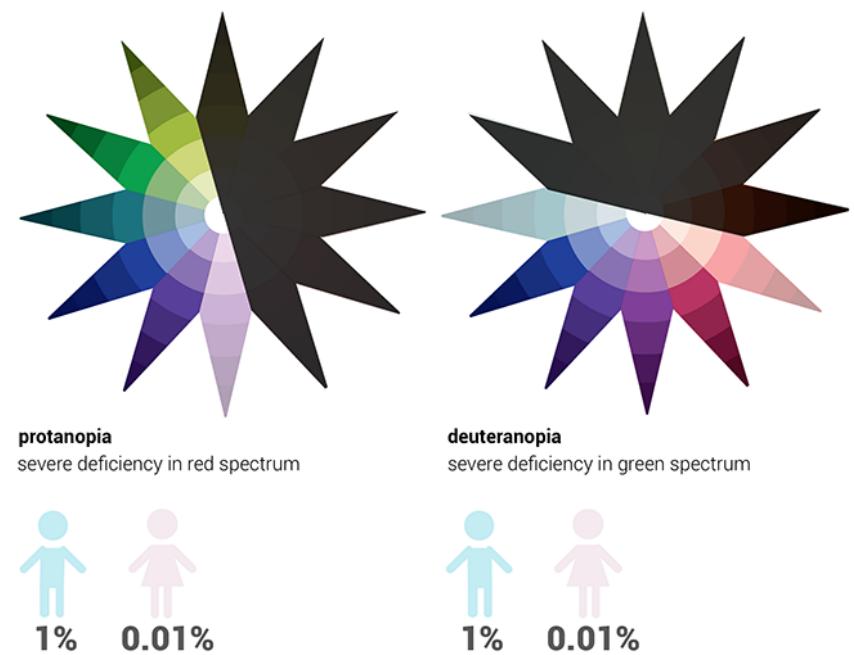

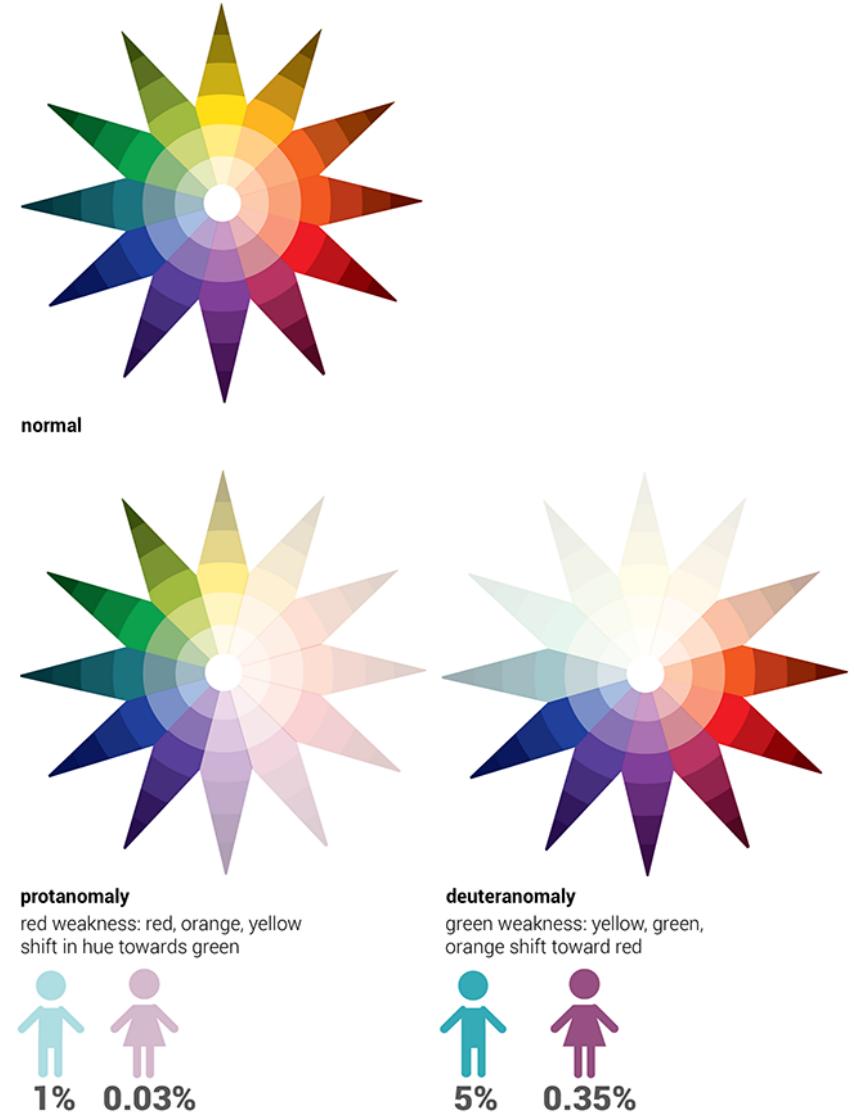

ACHROMATIC

Color Vision Deficiencies

- Affects 8% of males, 0.5% of females
- Consider alternatives
 - *Intensity* vs. *hue* for emphasis
 - *Size* of colored elements
 - *Proximity* of similar colors
- Use tools to check designs

Questions about Color?

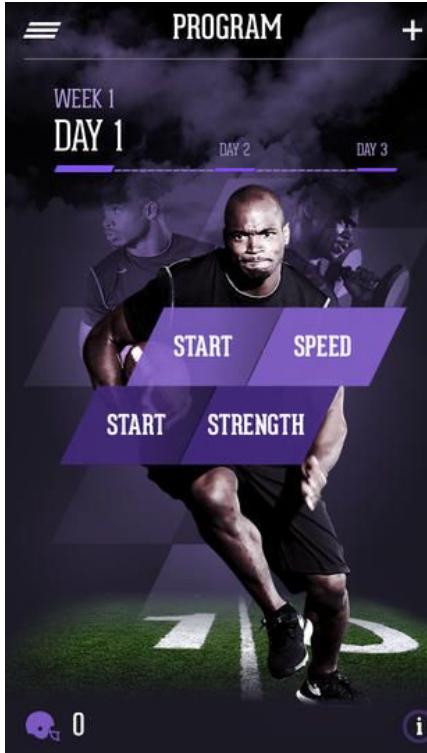

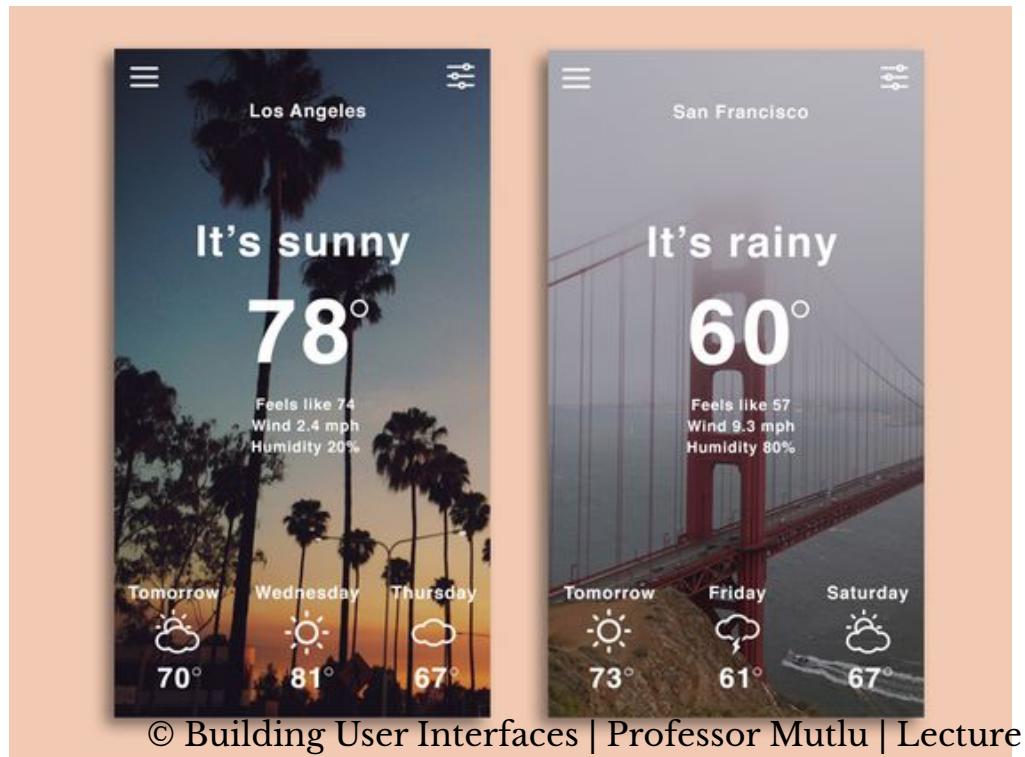

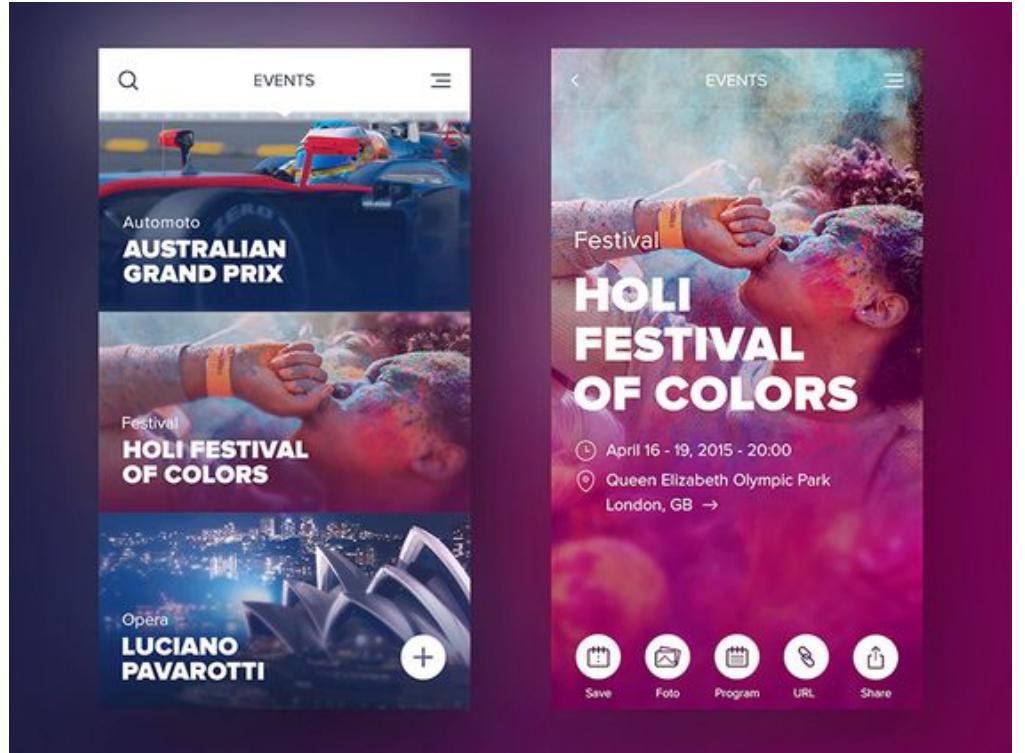

Images

Definition: Photographs, illustrations, three-dimensional art, silhouettes, icons, dingbats, infographics, and simpler shapes that convey rich information or context.

TABLE 5.1. Graphic types to use for varied goals.

Instructional or Communication Purpose	Consider These Graphic Types
Depict concrete objects	Photograph 3-D graphic Illustration Clip art (particularly in diagrams and as game elements)
Tell a story or provide a scenario	Sequence of photographs Sequence of illustrations Timeline
Persuade an audience	Sequence of photos or illustrations to tell a story Photographs that evoke emotions Visualization of statistics and data
Explain unfamiliar or complex concepts and theories	Visual metaphor Diagram showing connections
Demonstrate a procedure	Show the steps in a sequence of photos or illustrations Flow chart Series of screen captures for software simulation
Explain a process	Diagram the stages or operations of the process Icons or simple illustrations to represent each component
Point out something specific	Arrow or pointed shape Highlight Outline of a circle
Depict components of a system	Illustrated object with labels Diagram of the structure
Make comparisons	Bar graph Pictograph Line graph with multiple lines Table (when specific values are important)
Demonstrate trends in data	Line graph Scatter plot
Organization of information	Various chart types (hierarchical, radial, etc.) Concept map
Demonstrate motion without animation	Show object moving along a path Illustrations with motion lines Illustrations with arrows or dashed lines depicting movement
History or changes over time	Timeline (these don't have to be arrows) Sequence of photos or illustrations
